Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

1 INTRODUCTION

The purpose of the requirements specification is to establish user requirements for the proposed Portal for Small Vessels Registration accommodating MTT initial business requirement as the base. The required logical processes and data are modelled to establish the business solution. The final development estimates are based on this document. The document is aimed at both the user and system development community.

The system will provide the services to MTT's customers and integrate with stakeholders, providing services to internal and external clients in a way that will help to continue the automation and smart services journey.

The proposed application will comprise of the following main components:

- Laserfiche software
 - Internal portal (Administration and workflow related functions)
 - File repository
 - Workflow management system
- Customer portal
- Mobile application
- MicroServices for third party integration

1.1 INTENDED AUDIENCES

The intended audiences of stakeholders for this specification include the following user groups.

Users of MTT and MOI will have multiple roles and can access the system for varied functions of the below categories.

- Registrar
- Inspector
- Supervisor
- Director
- MOI Officer
- MTT Finance
- MTT IT Administration

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

1.2 SPECIFICATION OVERVIEW

This specification is organized into the following sections:

Introduction: which introduces the specification for the Small Ship Registration System (SSRP) to its readers.

System Overview: which provides a brief, high level description of the SSRP

Functional Requirements: which specifies the functional system requirements, workflow process mapping, data requirements, document requirements and system interfaces.

Reporting: which specifies the system data requirements in terms of required data components.

2 SYSTEM OVERVIEW

The proposed solution would equip MTT with end-to-end workflow and process automation features. MTT 's requirements will be covered spanning from workflow design, installation, configuration, execution, integration and tracking of performance and SLAs.

2.1 DEFINITION

The Small Vessels Registration System (SSRP) will consist of three interaction touchpoints:

- a) A portals' interface for the internal users and staff
- b) Portal interface to the Customer
- c) A mobile application for the customers
- d) Inspection App for the internal users.

The proposed web-based Vessels Registration System will help the Ship Registry Directorate to communicate with MTT customers electronically and follow-up with their requests and interact with external entities, conduct inspection, track requests, and generate reports.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

This document details the Functional Requirement of Small Vessels Registration System. The SSRP will have the following key services online:

Vessel Registration	▪ New Registration For Pleasure And Fishing Vessels ▪ New Registration For Jet Skies
Renewals	▪ Renewal Of Registration For Pleasure Vessels And Fishing Vessels ▪ Renewal Of Registration For Jet Skies ▪ Renewing Navigational Permit - Fishing Vessels ▪ Renewing Navigational Permit - Pleasure Vessels
Transfer of Ownership	▪ Transfer Of Ownership Of Pleasure And Fishing Vessels ▪ Transfer Of Jet Ski Ownership
Registration Alterations	▪ Changing The Registration From Pleasure To Fishing Or From Fishing To Pleasure ▪ Exchanging The Registration From Pleasure To Fishing Or Fishing To Pleasure
Navigation License	▪ New Navigation Permit - Pleasure Vessels ▪ New Navigational Permit - Fishing Vessels
Deletion	▪ Deletion Of Ships For Export Outside The Kingdom Of Bahrain
Replacement	▪ Request For New Number Plate/Side Stickers ▪ Request For Serial Number ▪ Request For Replacement Navigation Permit ▪ Request For Replacement Of Registration Certificate
Add/Remove Violations	▪ MOI Officer will be given the option to Add or Remove a violation for a vessel
Mobile Apps	▪ Required Functional Requirements ▪ Design Requirements Similar to the web solution, the mobile application will provide the option to initiate a workflow, submit application information and documents, request status updates and conduct payments.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

The SSRP will also integrate with the following to enable the handling of online payments and related functions:

1. IGA eKey

System will be integrated with eKey for user authorization. iGA to provide the API and specification. User profile creation in MTT system will be based on the individual/ authorized user's CPR Number.

2. IGA NPA For Online Payment

System will be integrated with IGA NPA for online payment where the customers will be able to pay for prescribe fees using their credit/debit cards.

3. MOFNE For Receipts Generation

Upon receiving successful payment through the NPA system, the receipt details will be submitted to MOFNE CFS WebService with the application number (Job Id) where MTT finance users can cross check the payment via the MTT system.

If additional information is required to be transferred from the MTT system to CFS, the required touchpoints have been highlighted within each process in this document. These include but not limited to,

- Individual data;
 - Miscellaneous receipts with customer name and CPR to be sent to CFS along with other details. (Transaction ID, Date, Amount ,service name , job ID etc)
- Company(s) data:
 - Customer Code to be passed to CFS along with other receipt details.

For Offline payments, Affno will provide a WebService to receive the offline payment request from the CFS. MOFNE CFS to be configured to pass the payment details along with the application number to the MTT system.

4. MOI to access vessels info and AIS

MTT System will transfer necessary vessel details to AIS when required. Affno will provide a WebService to expose the vessel information from MTT to MOI if required.

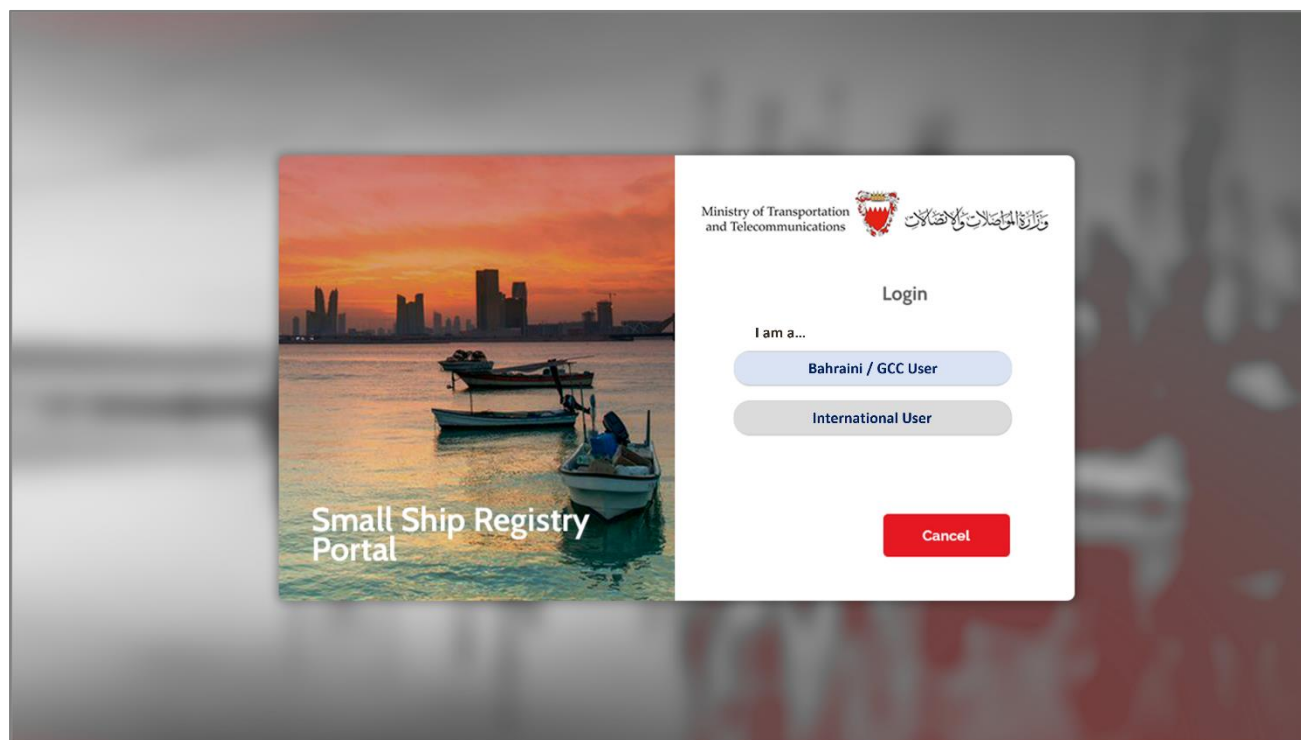

Integration will not be required on SSRP processes where applicable.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

2.2 GENERAL REQUIREMENT AND WIREFRAMES

This section covers the main elements common to all workflows and users upon login. With the initial interaction with the Small Vessels Registration System services and features, users can utilize the required function.

2.2.1 PORTAL LOGIN FOR USER TYPES

2.2.1.1 BAHRAINI AND GCC CITIZENS

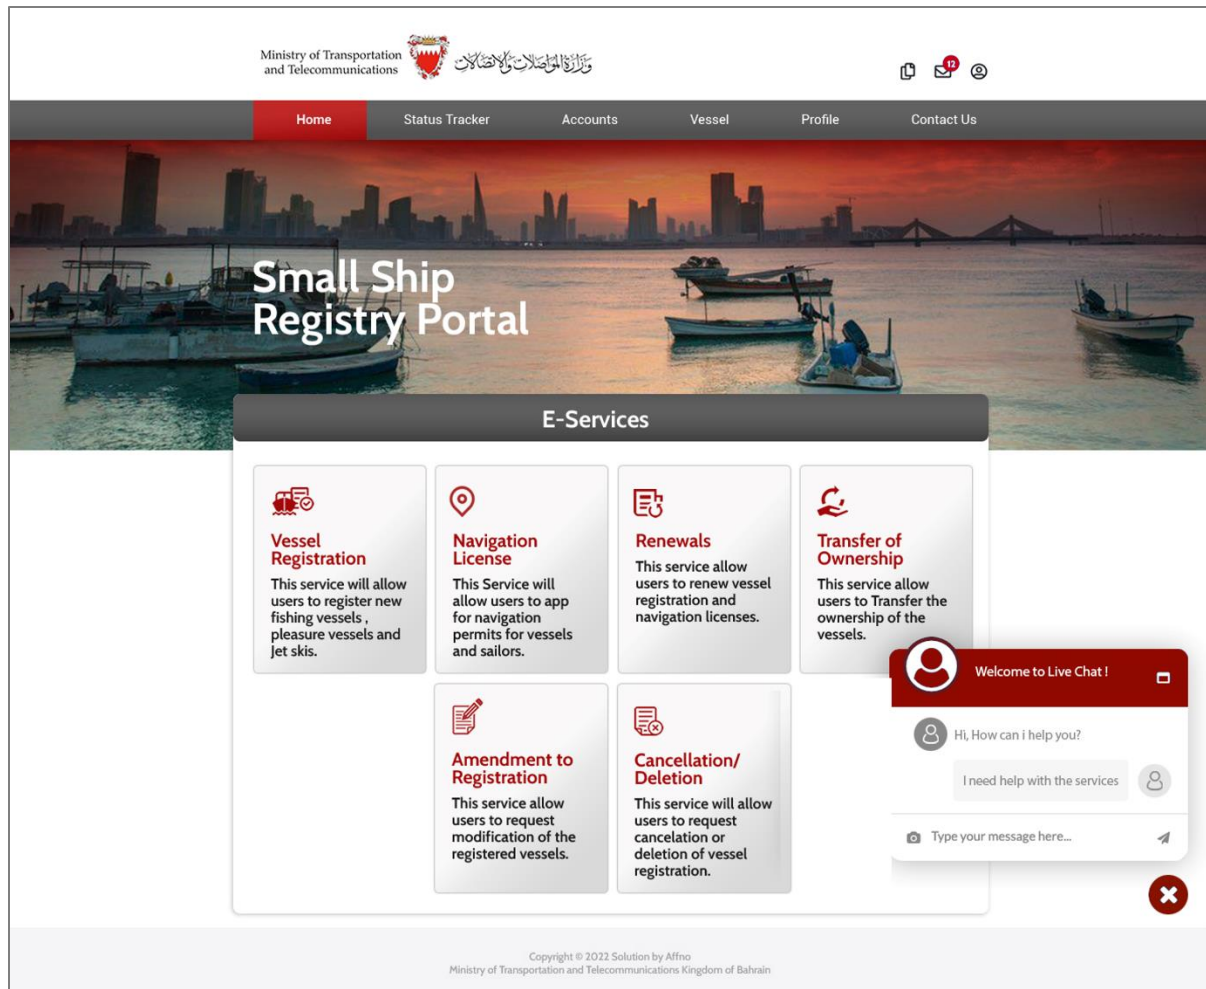

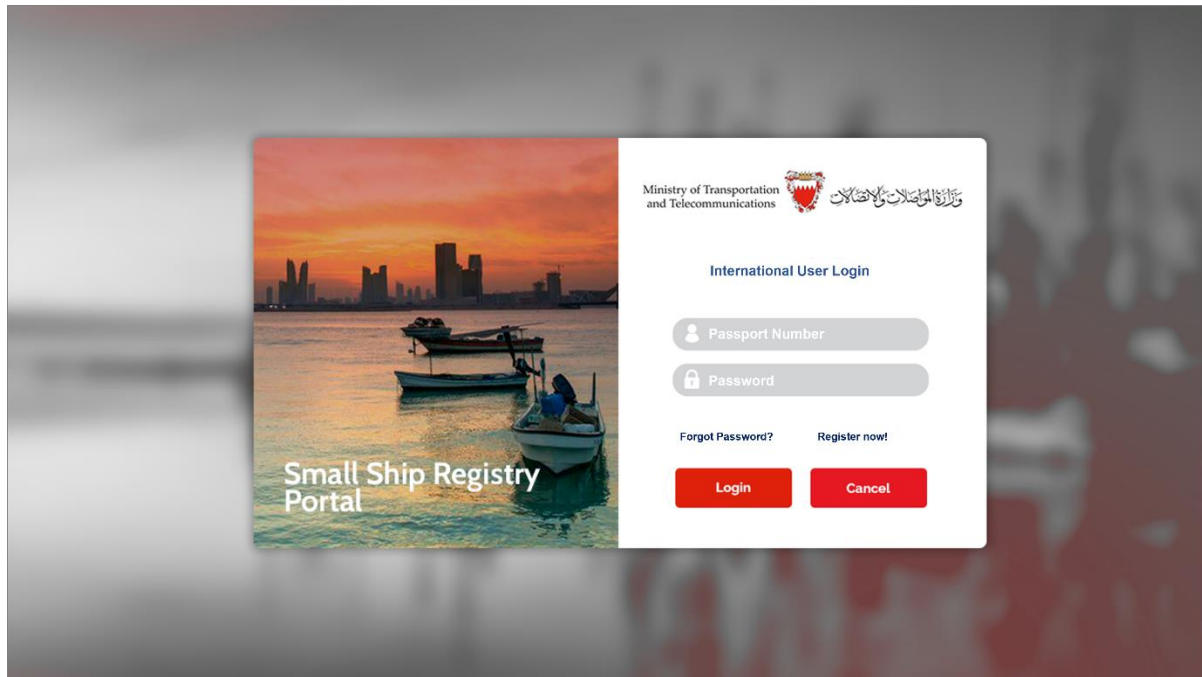

Users will be able to login via eKEY when selecting the **“Bahraini/ GCC User”** option. Upon clicking, the user will be authenticated through iGA eKey web portal. SSRP will load the information and services based on existing user profiles. As per feedback received, **GCC CPR** can be utilized for GCC customers. For new users, the system will request certain information (Email, Mobile Number, Date of Birth and Address) to be submitted to create the user profiles.

2.2.1.2 INTERNATIONAL CITIZENS

For international users (non-GCC and non-Bahraini), the SSRP will request certain information to register via the passport. The registration request will then be sent for internal approval by MTT. After the user has successfully registered, he can click on the login page- “International user” and login to the account.

If the customer is non-Bahraini and there is no E-Key/Bahraini CPR number, a copy of the passport will be needed.

2.2.2 SMALL VESSELS REGISTRATION SYSTEM – HOME PAGE E-SERVICES DASHBOARD

The eService’s dashboard will showcase main-modules, each holding relevant workflows as listed below. All workflows are detailed in this document section 3 Functional workflow requirements.

Vessel Registration	▪ New Registration For Pleasure And Fishing Vessels ▪ New Registration For Jet Skies
Renewals	▪ Renewal Of Registration For Pleasure Vessels And Fishing Vessels ▪ Renewal Of Registration For Jet Skies ▪ Renewing Navigational Permit - Fishing Vessels ▪ Renewing Navigational Permit - Pleasure Vessels
Transfer of Ownership	▪ Transfer Of Ownership Of Pleasure And Fishing Vessels ▪ Transfer Of Jet Ski Ownership
Registration Alterations	▪ Changing The Registration From Pleasure To Fishing Or From Fishing To Pleasure ▪ Exchanging The Registration From Pleasure To Fishing Or Fishing To Pleasure
Navigation License	▪ New Navigation Permit - Pleasure Vessels ▪ New Navigational Permit - Fishing Vessels
Deletion	▪ Deletion Of Ships For Export Outside The Kingdom Of Bahrain
Replacement	▪ Request For New Number Plate/Side Stickers ▪ Request For Serial Number ▪ Request For Replacement Navigation Permit ▪ Request For Replacement Of Registration Certificate
Registration	▪ Company Registrations for individuals representing a company
Add/Remove Violations	▪ MOI Officer will be given the option to Add or Remove a violation for a vessel
Mobile Apps	▪ Required Functional Requirements ▪ Design Requirements

Note: Live chat to be active during working hours only.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

2.2.3 STATUS TRACKER

The users shall be able to check the status of the requested services anytime.

Ministry of Transportation and Telecommunications

Home Status Tracker Accounts Vessel Profile Contact Us

Small Ship Registry Portal

Status Tracker

Select Service/ Vessel Name

All From To Submit

Job ID	Vessel Name	Service	Submit Date	Status
M-37289985	Vessel 1	Navigation Licenses	14/01/2022	In Progress
M-37257217	Vessel 2	Vessel Registration	31/12/2021	In Progress
M-37158913	Vessel 3	Inspection	30/12/2021	Process Completed

Copyright © 2022 Solution by Affno
Ministry of Transportation and Telecommunications Kingdom of Bahrain

The Status Tracker enables the Portal user to track the status of the applications he has submitted via the Portal. This screen will consist of an overview of the applications, with the latest application been displayed first. The page will also feature a filter and search facility whereby the Portal user can search by Service name, Vessel names and Date of Request/Submit.

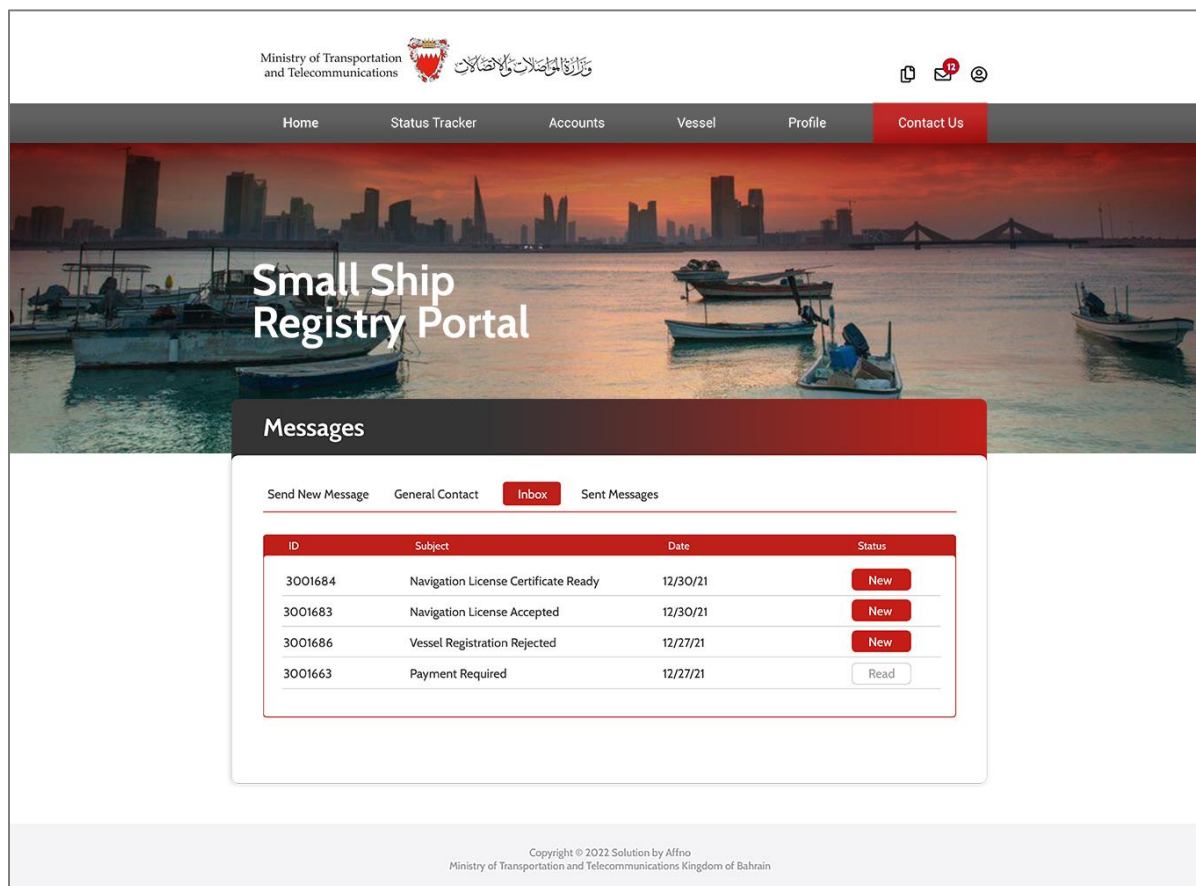

Given below is a snapshot of statuses across all processes.

In Progress	The process request has been submitted by the customer and is currently being reviewed by internal teams at MTT.
Make Payment	The application has been reviewed and the customer has to now make the required payment to move forward and further process the request.
Rejected	The request was rejected by the authorized MTT officers.
Defected	The submitted request has been referred back to the customer for changes or reviews.
Inspection Scheduled	Inspections required for this service, have been arranged by the respective officers and agreed upon by the portal user.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

Inspection On-going	The scheduled inspection is currently being conducted.
Process Completed	The process has successfully completed and is now closed.

2.2.4 MESSAGING TOOL

The Messages section will be made up of the following components;

- Inbox
- Send New Message
- Sent Messages
- General Contact

A notification will be sent to (small-ships@mtt.gov.bh) for messages received via the portal.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

Inbox

The Inbox will list all messages that the portal user has received from MTT with regard to each service request. Each message will contain the following;

- Message ID
- Message Subject
- Message Date
- Status (New / Read)

The user can read the message by clicking on the message subject to open. The messages will be ordered according to the latest date.

Send New Message

By Clicking on the 'Send New Message' tab the user would be taken to the contact us form. The date and username will be already captured on the form. The user will enter a message subject and message content and submit the message to the MTT. Message content will be limited to 1000 characters and there will be no restriction in terms of character language – English/Arabic.

Sent Messages

The Sent Messages section displays the messages sent by the Portal user to the MTT. The message list will be ordered by date in descending order, but the list can be re-sorted by clicking on the listing headings. The user can view the sent message by clicking on the message subject.

General Contact

The General Contact us section will list the contact details of the MTT.

2.2.5 PAYMENTS

The 'Payments' section will provide the user with details about their financial transactions relating to each service request. This section would be made up of the following sub sections:

- Pending Payments
- Transaction History
- Tariff

Pending Payments

This section will display all the pending transactions the user needs to complete payment with MTT. The user can choose to pay one or many transactions at the same time through the online payment gateway. Each transaction would provide details of the, Job ID, Service Name, Vessel/Jet Ski Name, status (Expiring soon, Expired) and the value.

Ministry of Transportation and Telecommunications

Home Status Tracker **Accounts** Vessel Profile Contact Us

Small Ship Registry Portal

Payments

Pending Payments Transaction History Tariff

Instructions

The following payments can be made online through the SRP using your Visa or Master Credit Card. The transactions are facilitated through a secure payment (SSL) channel. Alternatively you can also make the payments in person by cash or you may draw a cheque in favour of 'Ports and Maritime'

Transaction Details

Job Number/ID	Vessel Name	Service	Value (BHD)

Copyright © 2022 Solution by Affno
Ministry of Transportation and Telecommunications Kingdom of Bahrain

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

The user can choose to pay for prescribe fee online through the Portal or he can submit the payment manually by visiting the MTT. To pay for the selected transactions, the user has to select the Job ID by clicking on the 'tick box(s)' and clicking Continue.

Once the user clicks 'Continue' he would be taken to the payment summary page. This includes the date, Transaction Number(s) being settled, Vessel details, Service names and the total amount to be paid for all selected transactions. Once the Portal user clicks on 'Pay' to process the payment, the transaction details are submitted to the IGA NPA payment gateway for validation. Based on the validation a successful or unsuccessful message (along with payment gateway error) would be displayed to the user. An email of the transaction receipt will also be sent to the Portal user's registered email address.

Transaction History

The transaction history page would allow the Portal user to search for the transactions made via the Portal, i.e. online transactions. The search parameters can be a combination of the following;

- Transaction Status (All / Successful / Unsuccessful)
- Service Name (All / List of service names)
- Vessel Name (Owned by/registered to authorized login user)
- Period (From – To)

In addition to the search criteria a summary of the last transaction would be made available on the same screen showing:

- Date of transaction
- Transaction Reference Number
- Service Name
- Vessel Name
- Card Type – Credit/ Debit
- Value (BHD)
- Status (Success/Failure)

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

3 FUNCTIONAL WORKFLOW REQUIREMENTS

This section of the SRS specifies the functional requirements of the Ship Registry Directorate – Small Vessels Registration Systems in terms of workflow process mapping, input data, wireframe and documentation requirement.

3.1 NEW REGISTRATION FOR PLEASURE AND FISHING VESSELS

The main functional service available to a customer, is the ability to register Pleasure Vessels and Fishing Vessels.

1. The service is initiated by the customer, where the registration form is submitted along with the required documents.
2. The registrar will then review the request and return to customer if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request, forwarding for necessary approvals by the supervisor.
3. The supervisor would then approve/reject the forwarded request. If needed, the request would be sent back to the registrar for further changes.
4. Once the request is approved by the registrar and supervisor, the customer would be requested to pay the registration fee/ inspection fee.
5. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
6. The online or offline payment is verified, the customer will receive the letter to print the number plates and stickers from a selected printing house.

Inspection sub-workflow process

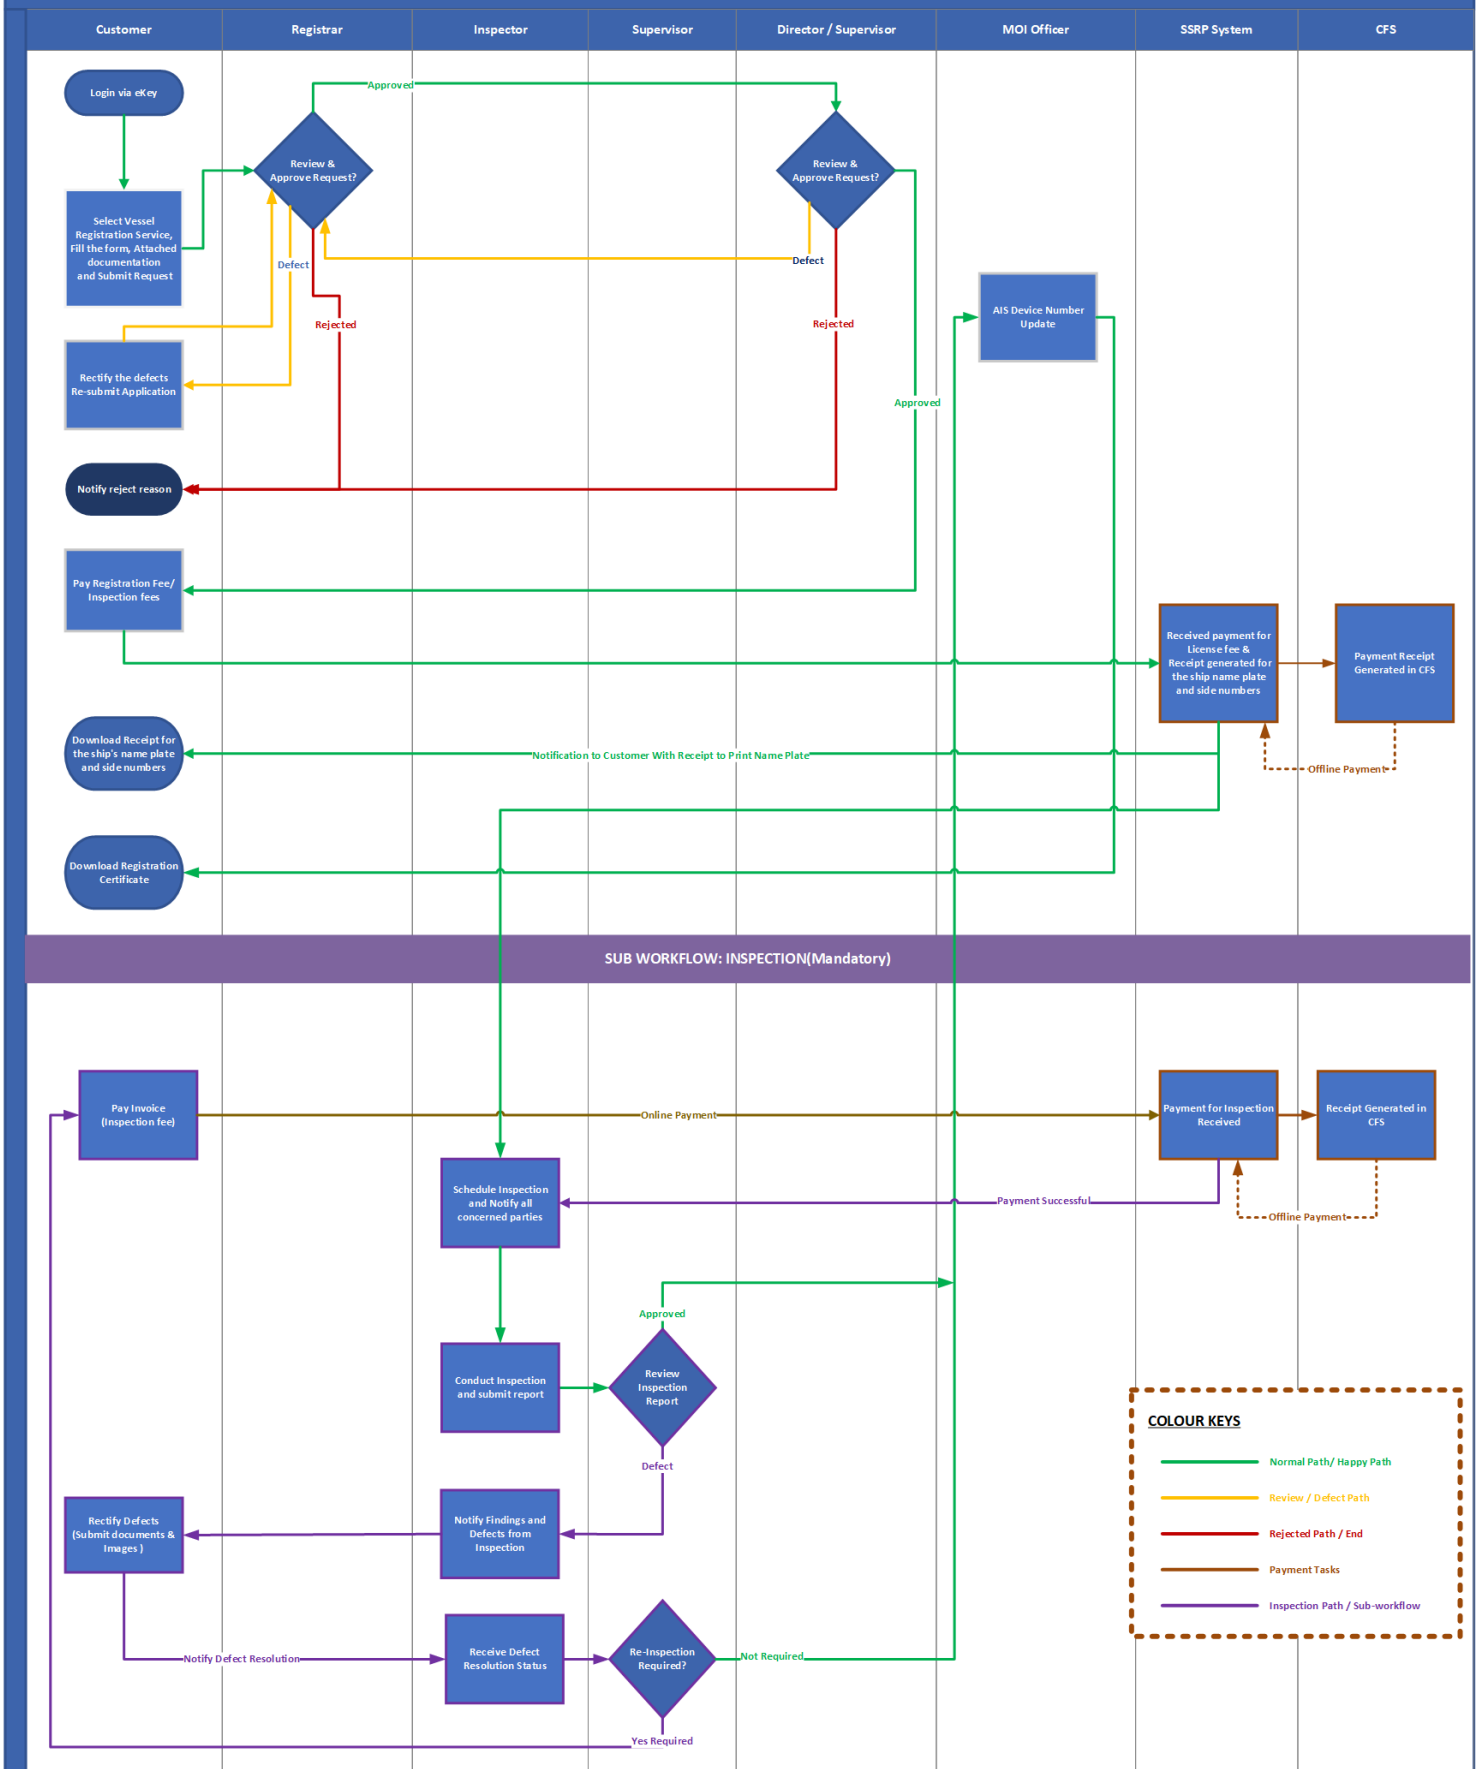

7. The inspector plays the pivotal role within this process. He would schedule the inspection and notify all concerned parties.
8. From that point, when a date is agreed upon, the inspection is conducted.
9. The inspector would proceed to submit a report containing the inspection checklist to the supervisor of the information identified. This can be conducted via the inspection process sub-workflow task screen shown below. The interface would act as a single point for inspector and customer to upload and communicate inspection related details.
10. The supervisor would review the report and take the decision on how to proceed. He would opt-to approve the inspection and move forward or report defects back to the inspector.
11. If there are defects,

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

- 11.1. The inspector would notify findings and defects to the customer.
- 11.2. The customer would take necessary measures and upon rectification, he would submit proof of rectification and the changes done. This can be done via the inspection process sub-workflow task screen shown below.
12. Upon customer rectification and submission, the supervisor will decide on if a re-inspection is needed. If required,
 - 12.1. The customer must pay another inspection fee.
 - 12.2. The customer will then make the requested payment, which is verified and validated by the SSRP system.
 - 12.3. The process flow would then continue from above inspection sub-workflow process (step 7 to 13)
13. Once the inspection is approved, The MOI Officer would update the device number. (If AIS device is not required, MOI Officer will update the field as “Not Applicable”)
- 14.** The registration process is now complete allowing the customer to download registration certificate.

3.2 RENEWAL OF REGISTRATION FOR PLEASURE AND FISHING VESSELS

The main functional service available to a customer, is the ability to renew the registration for Pleasure Vessels and Fishing Vessels.

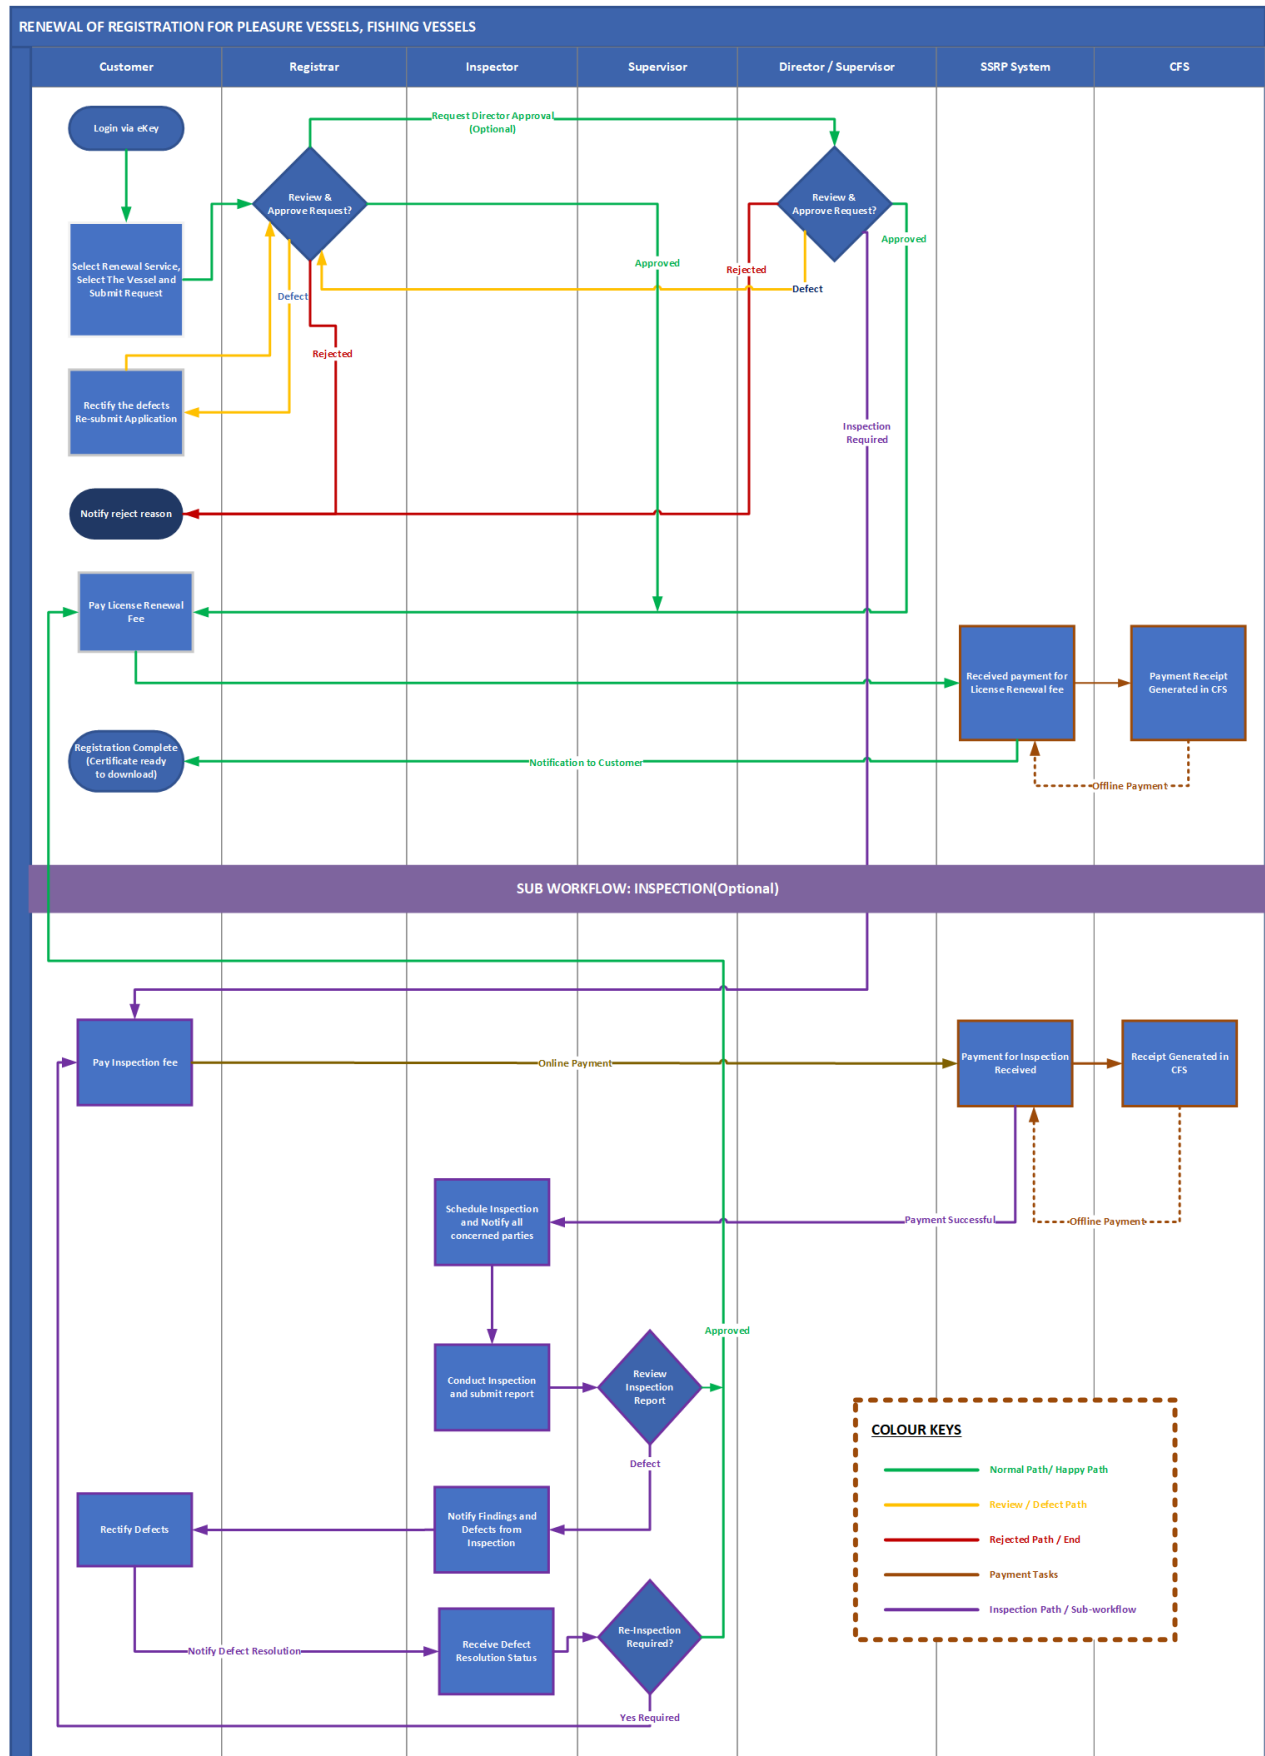

1. The service is initiated by the customer, where the registration renewal form is submitted along with the required documents.
2. The registrar will then review the request and return to customer if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request, forwarding for necessary approvals.
3. With the approval by the registrar, the request can be optionally forwarded for director's approval. As the director approval will be optional, the registrar approval only could be sufficient.
 - 3.1. If the director approval is required, the request would be approved/ rejected or defected If needed, the director can request for an inspection at this point, triggering the inspection payment workflow.
4. If the director approval is not required, once the request is approved by the registrar, the customer would be requested to pay the Renewal fee.
5. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
6. The online or offline payment is verified, and the certificate will be available for download.
7. If the inspection is required, the inspection process will be initiated.

Inspection sub-workflow process

8. The inspector plays the pivotal role within this process. He would schedule the inspection and notify all concerned parties
9. From that point, when a date is agreed upon, the inspection is conducted.
10. The inspector would proceed to submit a report to the supervisor of the information identified.
11. The supervisor would review the report and take the decision on how to proceed. He would opt-to approve the inspection and move forward or report defects back to the inspector.
12. If there are defects,
 - 12.1. The inspector would notify findings and defects to the customer.
 - 12.2. The customer would take necessary measures and upon rectification, the customer will submit documents and images.
13. Upon customer rectification and submission, the supervisor will decide on if a **re-inspection** is needed. If **required**,

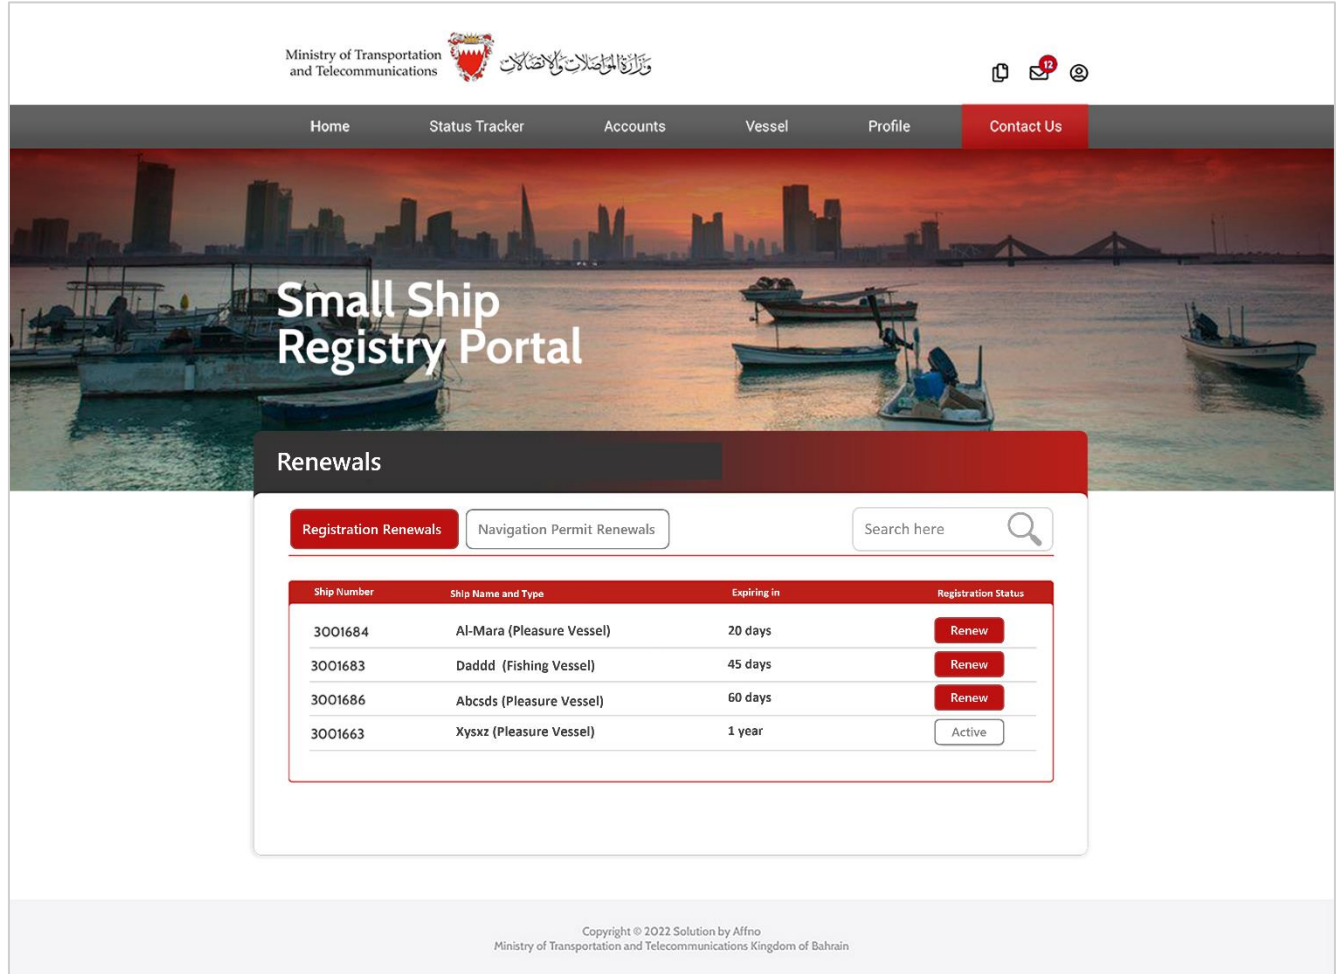

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

- 13.1. The customer must pay another inspection fee.
- 13.2. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
- 13.3. The process flow would then continue from above inspection sub-workflow process (step 7 to 13)
14. If the **re-inspection** is **not required**, the registration renewal process is now complete allowing the customer to download registration certificate.

3.2.2 FORM

The customer can login, select the renewal and select the vessel he wishes to renew using the below screen. This would act as a single renewals' status checking window.

3.3 TRANSFER OF OWNERSHIP OF PLEASURE AND FISHING VESSELS

This is a key functional service available to a customer or ship Seller, providing the ability to transfer the ownership of their pleasure and fishing vessel.

1. The service is initiated by the seller, where the ownership transfer form is submitted along with authorized buyer information and the required documents.
2. The registrar will then review the request and return to seller if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. The request can be optionally forwarded for supervisor / director's approval. As the director approval will be optional, the registrar approval only could be sufficient.
 - 3.1. If the supervisor ~~director~~ approval is required, Request will be forwarded to the supervisor where he/she has the options to Approve/Reject or Defect the application. If needed, the director can request for an inspection at this point, triggering the inspection sub workflow.
4. If the supervisor approval is not required, once the request is approved by the registrar, the buyer will be notified requesting to pay the registration fee. (for new buyers system will create accounts upon approval)
5. The buyer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
6. The online or offline payment is verified, the process will be forwarded to the MOI officer to update the AIS device number for the vessel. After the MOI officer has updated the number, the registrar would confirm that the number plates were received. When complete, the new registration certificate will be available for download.
7. If an inspection is required, the inspection process is then initiated.

Inspection sub-workflow process

8. The inspector plays the pivotal role within this process. He would schedule the inspection and notify all concerned parties
9. From that point, when a date is agreed upon, the inspection is conducted.
10. The inspector would proceed to submit a report to the supervisor of the information identified.
11. The supervisor would review the report and take the decision on how to proceed. He would opt-to approve the inspection and move forward or report defects back to the inspector.
12. If there are defects,
 - 12.1. The inspector would notify findings and defects to the customer.
 - 12.2. The customer would take necessary measures and upon rectification, the customer will submit documents and images.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

13. Upon customer rectification and submission, the supervisor will decide on if a **re-inspection** is needed. If **required**,
 - 13.1. The customer must pay another inspection fee.
 - 13.2. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
 - 13.3. The process flow would then continue from above inspection sub-workflow process (step 7 to 13)
14. If the **re-inspection** is **not required**, The MOI Officer would update the AIS device information. After the MOI officer has updated the number, the registrar would confirm that the number plates were received.
15. Upon updating, the ownership transfer process is completed, and the buyer can download the registration certificate.

Sub-Scenario I

In the event the Seller wishes to retain existing vessel name and number, the following process should be mapped.

1. At the initial stage of form submission, the seller must declare his willingness to maintain the current vessel name and number.
2. After the standard process has received registrar and/or director approval, the supplier will be triggered to make a payment in order to keep his vessel information.
3. Alongside the buyer payment, the buyer will be prompted to enter a new preferred vessel name. The screen is shown below.

3.4 NEW REGISTRATION FOR JET SKIES

This is a key functional service available to a customer within the registration's module providing the ability to register for jet skies.

1. The service is initiated by the customer, where the new registration form is submitted along with the required documents.
2. The registrar will then review the request and return to customer if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. The request can be optionally forwarded for director's approval. As the director approval will be optional, the registrar approval only could be sufficient.
 - 3.1. If the director approval is required, the request will be forwarded to the director where he/she has the options to approve/reject or defect the application. If needed, the director can request for an inspection at this point, triggering the inspection sub-workflow.
4. If the director approval is not required, once the request is approved by the registrar, the customer would be requested to pay the registration fee.
5. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
6. The online or offline payment is verified, the new registration certificate will be available for download along with the letters for name plate and side stickers.
7. If an inspection is required, the inspection process is then initiated.

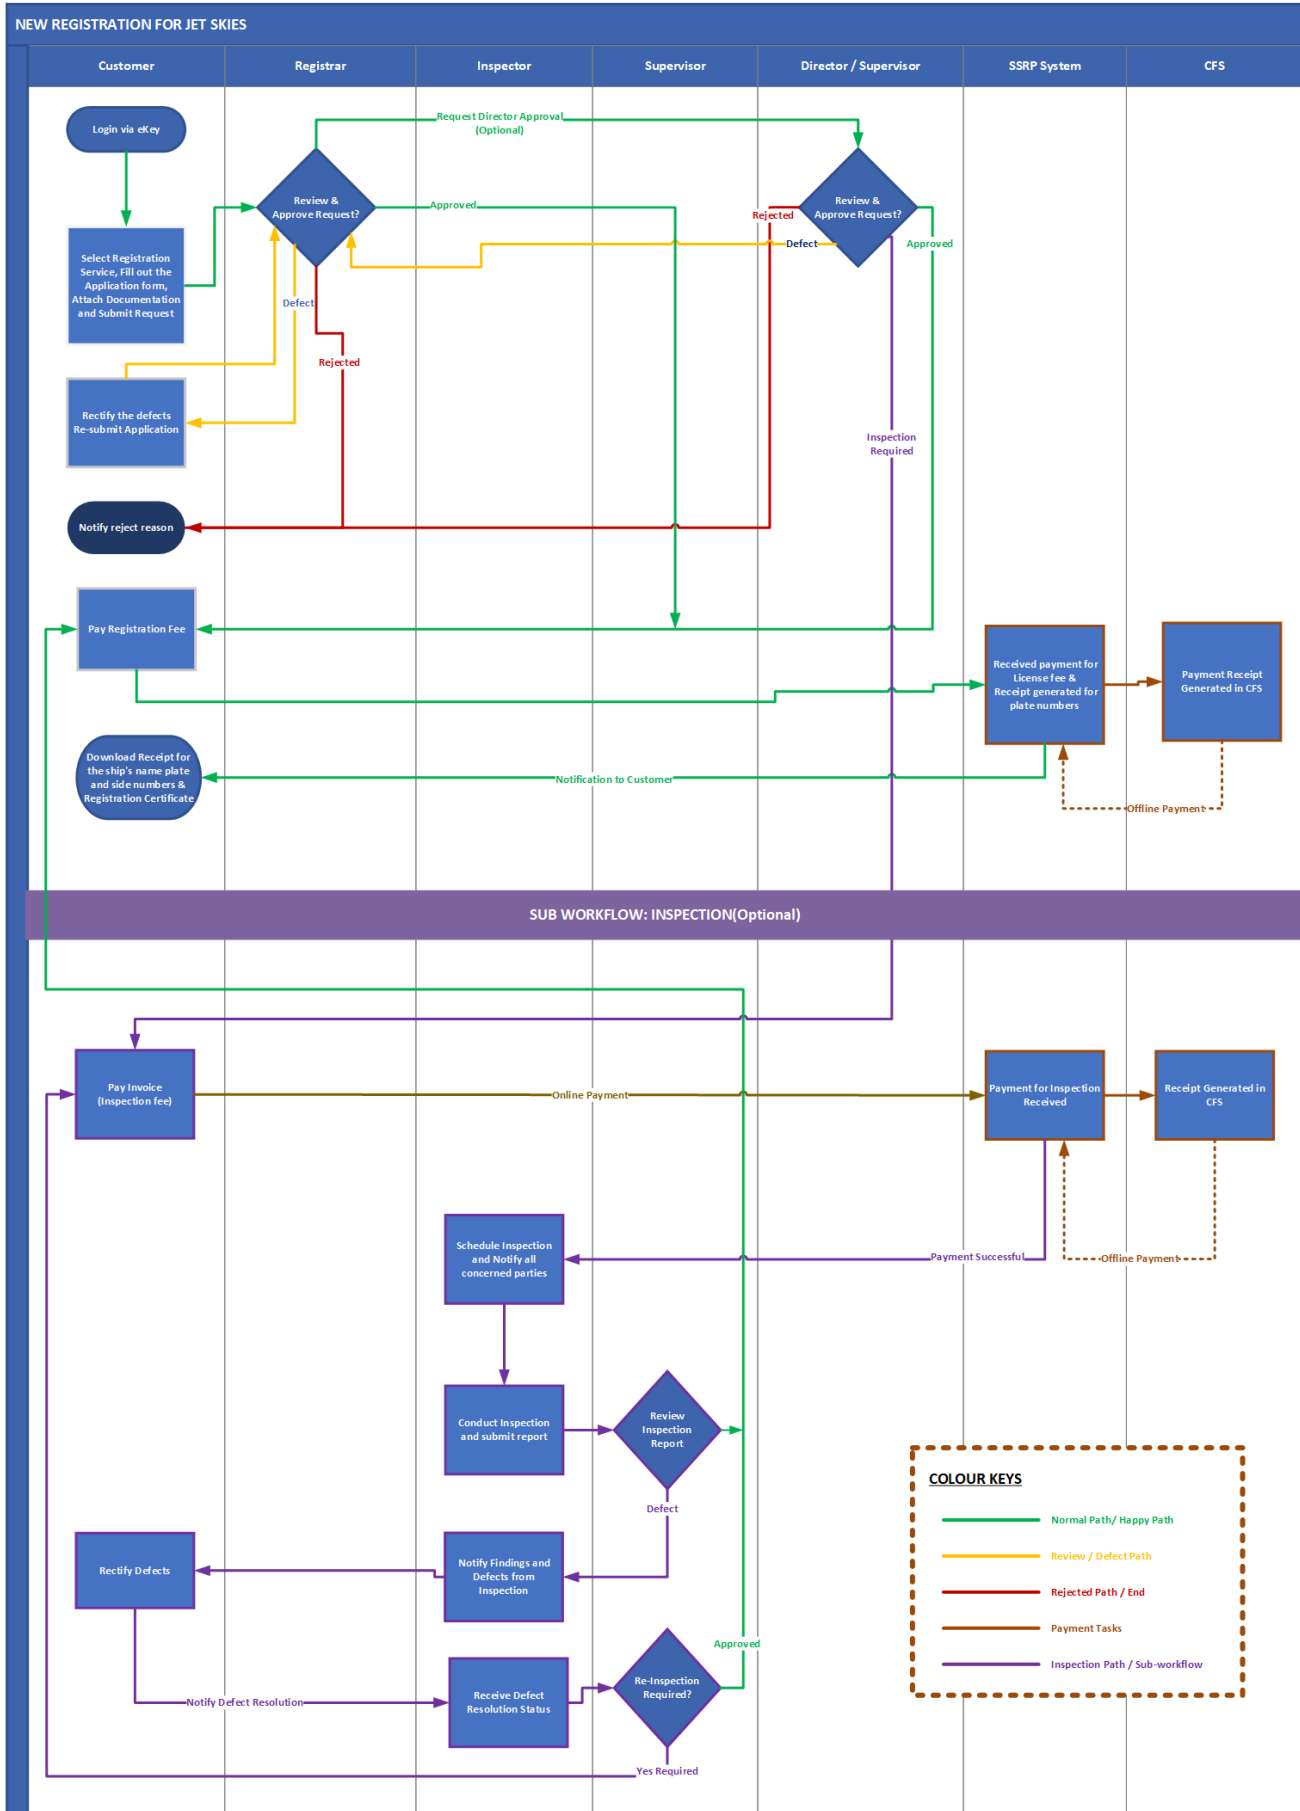

Inspection sub-workflow process

8. The inspector plays the pivotal role within this process. He would schedule the inspection and notify all concerned parties
9. From that point, when a date is agreed upon, the inspection is conducted.
10. The inspector would proceed to submit a report to the supervisor of the information identified.
11. The supervisor would review the report and take the decision on how to proceed. He would opt- to approve the inspection and move forward or report defects back to the inspector.
12. If there are defects,
 - 12.1. The inspector would notify findings and defects to the customer.
 - 12.2. The customer would take necessary measures and upon rectification, the customer will submit documents and images.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

13. Upon customer rectification and submission, the supervisor will decide on if a **re-inspection** is needed. If **required**,
 - 13.1. The customer must pay another inspection fee.
 - 13.2. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
 - 13.3. The process flow would then continue from above inspection sub-workflow process (step 7 to 13)
14. If the **re-inspection** is **not required**, the registration for jet skies process is completed and the customer can download the registration certificate.

3.5 RENEW REGISTRATION FOR JET SKIES

This is a key functional service available to a customer within the registration renewal module providing the ability to renew registration for jet skies.

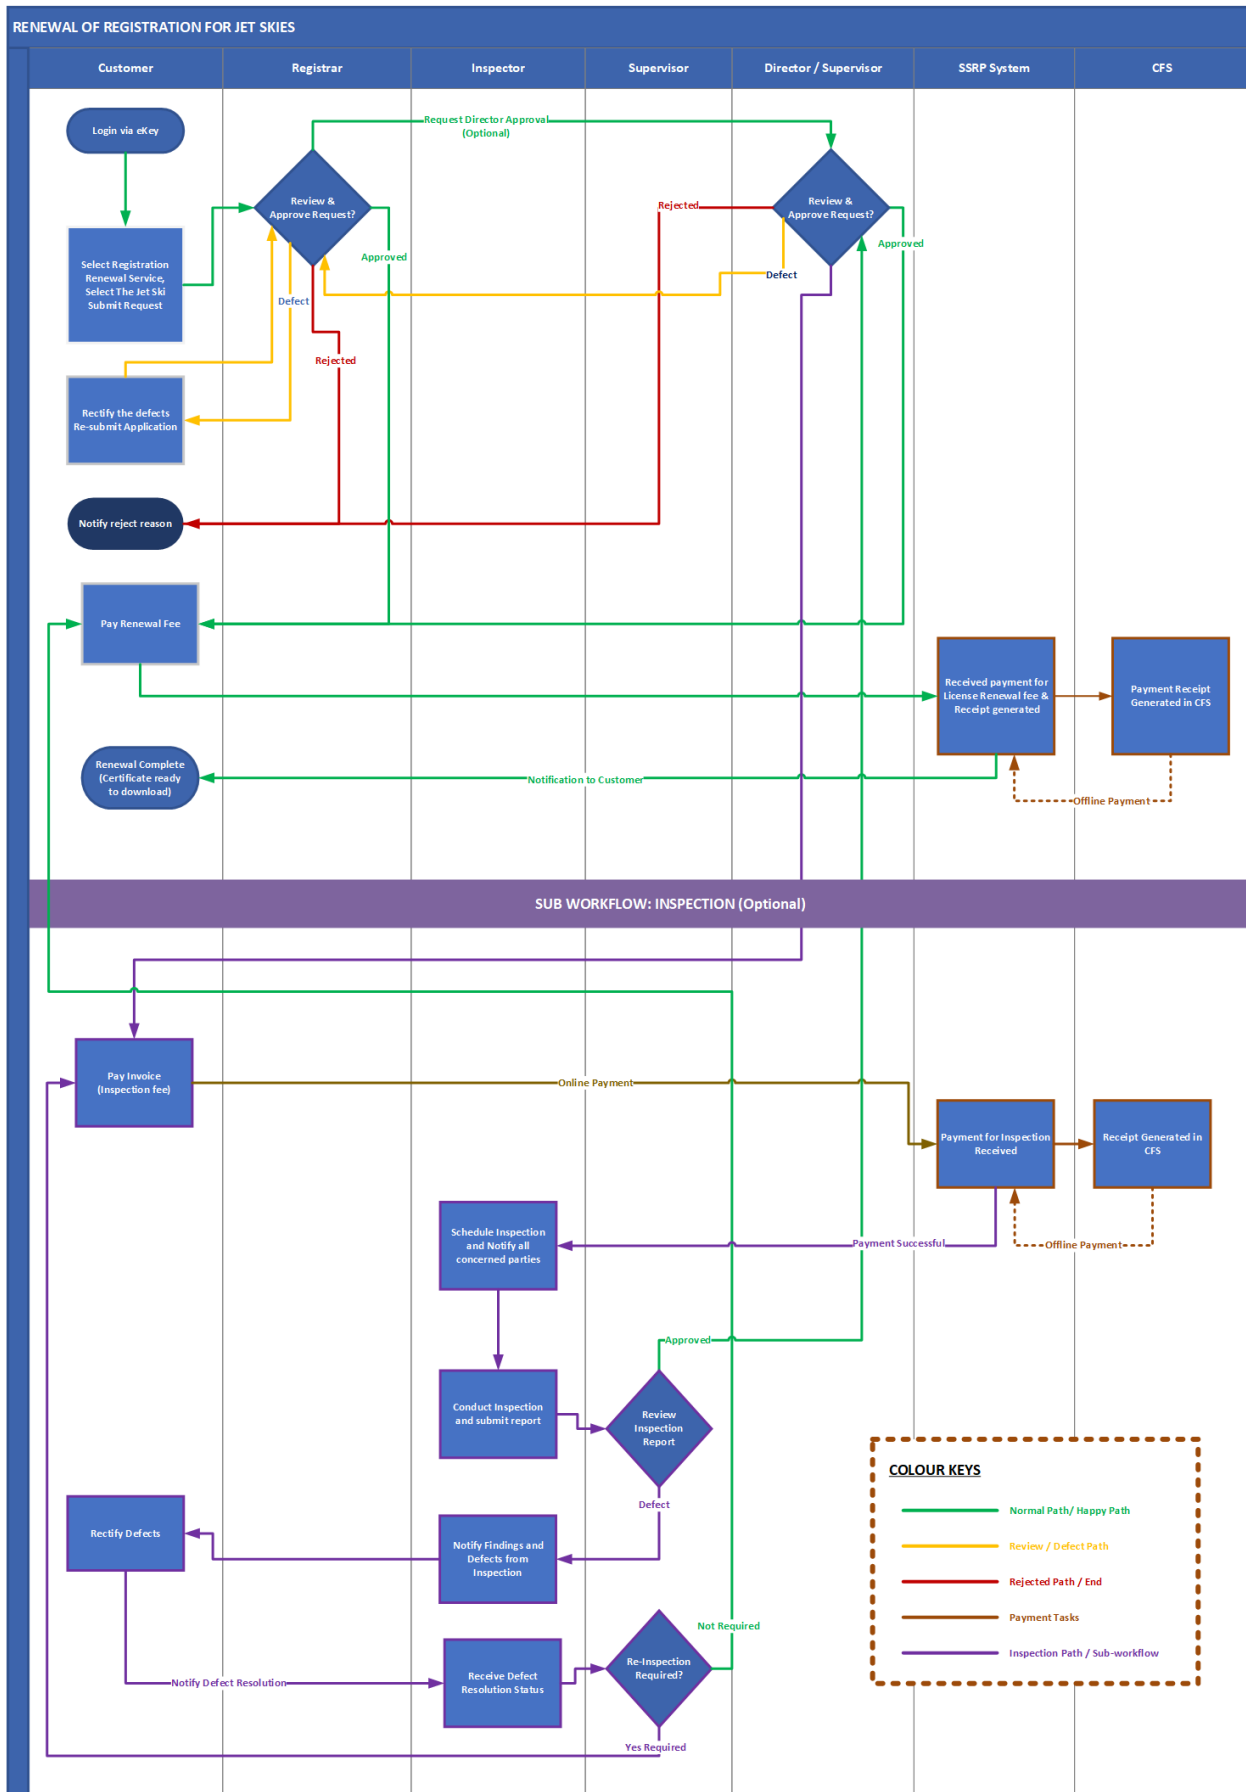

1. The service is initiated by the customer, where the new registration form is submitted along with the required documents.
2. The registrar will then review the request and return to customer if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. With the approval by the registrar, the request can be optionally forwarded for director's approval. As the director approval will be optional, the registrar approval only could be sufficient.
 - 3.1. If the director approval is required, the request would be approved/ rejected or reviewed. If needed, the director can request for an inspection at this point, triggering the inspection payment workflow.
4. If the director approval is not required, once the request is approved by the registrar, the customer would be requested to pay the registration fee/ inspection fee.
5. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
6. The online or offline payment is verified, the inspection will be initiated at this point. With successful completion of the inspection, the new registration certificate will be available for download.
7. The inspection process is then initiated from this point onwards.

Inspection sub-workflow process

8. The inspector plays the pivotal role within this process. He would schedule the inspection and notify all concerned parties
9. From that point, when a date is agreed upon, the inspection is conducted.
10. The inspector would proceed to submit a report to the supervisor of the information identified.
11. The supervisor would review the report and take the decision on how to proceed. He would opt-to approve the inspection and move forward or report defects back to the inspector.
12. If there are defects,
 - 12.1. The inspector would notify findings and defects to the customer.
 - 12.2. The customer would take necessary measures and upon rectification, the customer will re-submit documents and images.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

13. Upon customer rectification and re-submission, the supervisor will decide on if a **re-inspection** is needed. If **required**,
 - 13.1. The customer must pay another inspection fee.
 - 13.2. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
 - 13.3. The online or offline payment is verified, and the receipt print name plate will be available for download upon successful inspection.
 - 13.4. The process flow would then continue from above inspection sub-workflow process (step 7 to 13)
14. If the **re-inspection** is **not required**, the registration for jet skies process is completed and the customer can download the registration certificate.

3.5.2 FORM

The customer can login and select the jet ski he wishes to renew using the below screen. This would act as a single renewals' status checking window.

3.6 TRANSFER OF OWNERSHIP OF JET SKIES

This is a key functional service available to a customer or Jet Ski Seller, providing the ability to transfer the ownership for their owned Jet Ski.

1. The service is initiated by the seller, where the ownership transfer form is submitted along with the required documents.
2. The registrar will then review the request and return to seller if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. The request can be optionally forwarded for director's approval. As the director approval will be optional, the registrar approval only could be sufficient.
 - 3.1. If the director approval is required, Request will be forwarded to the director where he/she has the options to Approve/Reject or Defect the application. If needed, the director can request for an inspection at this point, triggering the inspection sub workflow.
4. If the director approval is not required, once the request is approved by the registrar, the buyer will be notified requesting to pay the registration fee. (For new buyers' system will create accounts upon approval)
5. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
- ~~6. The online or offline payment is verified, the process will be forwarded to the MOI officer to update the AIS device number for the vessel. After the MOI officer has updated the number, the registrar would confirm that the number plates were received. When complete, the new registration certificate will be available for download.~~
7. The inspection process is then initiated from this point onwards.

Inspection sub-workflow process

8. The inspector plays the pivotal role within this process. He would schedule the inspection and notify all concerned parties
9. From that point, when a date is agreed upon, the inspection is conducted.
10. The inspector would proceed to submit a report to the supervisor of the information identified.
11. The supervisor would review the report and take the decision on how to proceed. He would opt-to approve the inspection and move forward or report defects back to the inspector.
12. If there are defects,
 - 12.1. The inspector would notify findings and defects to the customer.
 - 12.2. The customer would take necessary measures and upon rectification, the customer will submit documents and images.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

13. Upon customer rectification and submission, the supervisor will decide on if a **re-inspection** is needed. If **required**,
 - 13.1. The customer must pay another inspection fee.
 - 13.2. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
 - 13.3. The process flow would then continue from above inspection sub-workflow process (step 7 to 13).
14. If the **re-inspection** is **not required**, the ownership transfer process is completed and the buyer can download the registration certificate.

Upon selecting “Add New Buyer” from the above screen, the below pop-ups would load to the seller. With this step, the SSRP will be able to validate if the newly entering buyers are registered with the portal. If they are registered, the below message would appear, auto-populating available data.

The screenshot shows a form titled "Enter Buyer Details" with a dark header bar containing an upward arrow. The form contains several input fields: "Name", "CPR Number", "Nationality", "Address", and "Phone Number(s)". A red "Verify" button is positioned below the "CPR Number" field. To the right of the "Verify" button, a green checkmark icon is displayed next to the text "Buyer Registered!". A red bracket on the left side of the "Nationality", "Address", and "Phone Number(s)" fields is labeled "Auto Populated". A red arrow points from a red box on the right, which contains the text "Verifying if buyer exists within the SSRP as a registered user", to the "Verify" button.

In the event, the buyer is not registered, the form will request additional details to be entered in order to create the profile for that buyer.

Note: If the buyer is the authorized user at a company, the company should be registered separately prior to applying for the service.

The screenshot shows the same "Enter Buyer Details" form. In this instance, the "Verify" button is red. To its right, a red "X" icon is displayed next to the text "Buyer Account Not Available" and "Please Enter Details.". A red arrow points from a red box on the right, which contains the text "Verifying if buyer exists within the SSRP as a registered user", to the "Verify" button.

3.7 CHANGING THE REGISTRATION FROM PLEASURE TO FISHING OR FROM FISHING TO PLEASURE

This service allows the provisioning of changing the vessel type from fishing to pleasure and vice-versa.

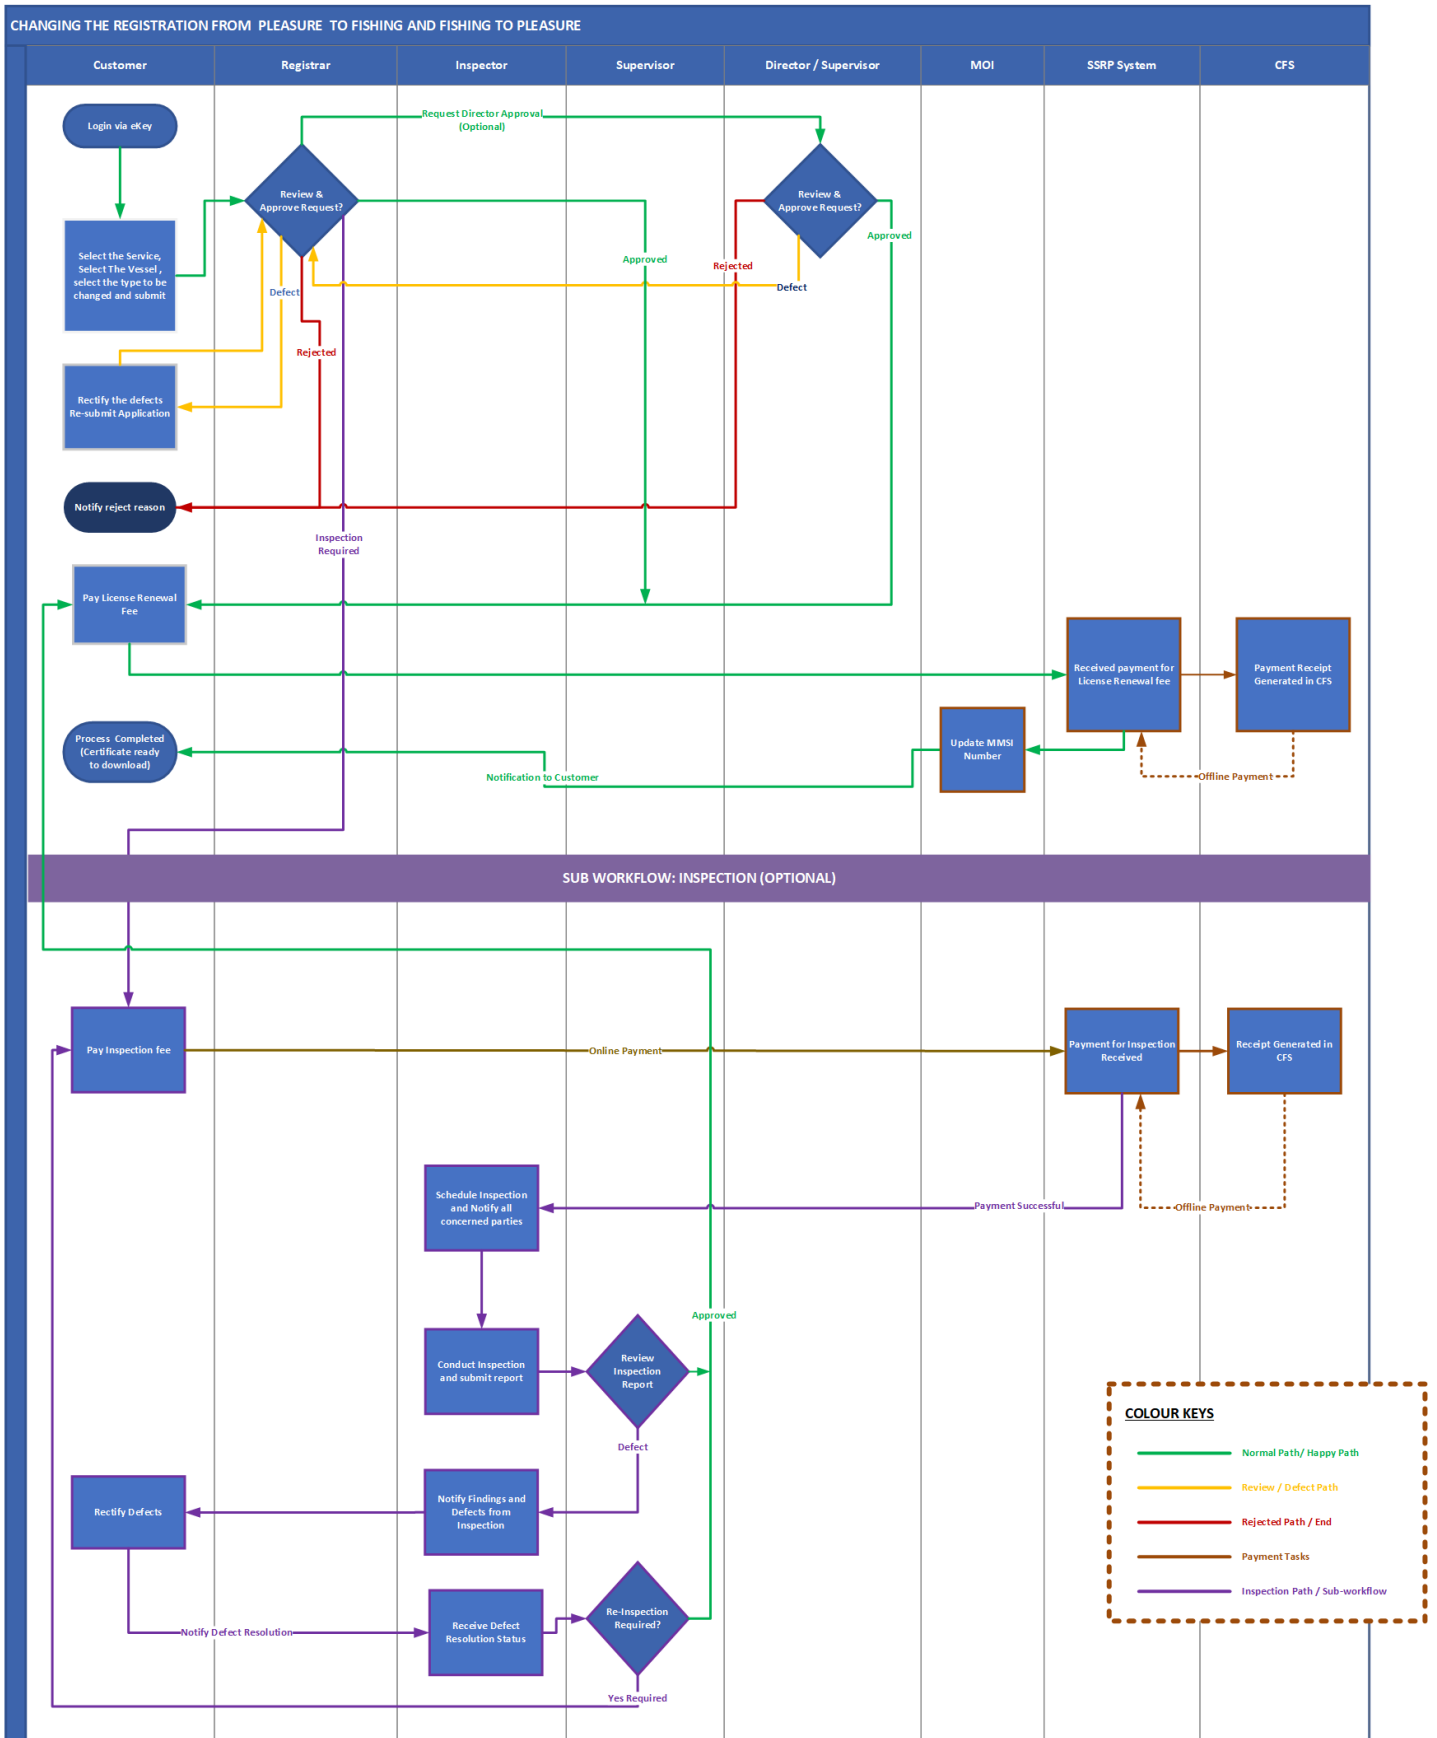

1. The service is initiated by the customer, where the request to change the vessel type form is submitted along with the required documents.
2. The registrar will then review the request and return to customer if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
 - 2.1. If needed, the registrar can request for an inspection at this point, triggering the inspection payment workflow. Inspections are optional and can be done only as needed.

Inspection sub-workflow process

3. The customer must pay the inspection fee.
 4. The inspector plays the pivotal role within this process. He would schedule the inspection and notify all concerned parties
 5. From that point, when a date is agreed upon, the inspection is conducted.
 6. The inspector would proceed to submit a report to the supervisor of the information identified.
 7. The supervisor would review the report and take the decision on how to proceed. He would opt-to approve the inspection and move forward or report defects back to the inspector.
 8. If there are defects,
 - 8.1. The inspector would notify findings and defects to the customer.
 - 8.2. The customer would take necessary measures and upon rectification, the customer will submit documents and images.
 9. Upon customer rectification and submission, the supervisor will decide on if a **re-inspection** is needed. If **required**,
 - 9.1. The process would continue at step 03 – 09.
-
10. **If the inspection is not required**, the request can be optionally forwarded for director's approval. As the director approval will be optional, the registrar approval only could be sufficient.
 - 10.1. If the director approval is required, the request would be approved/ rejected or reviewed.
 11. If the director approval is not required, once the request is approved by the registrar, the customer would be requested to pay the prescribed fee.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

12. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
13. The online or offline payment is verified; The MOI Officer would update the MMSI number.
14. Upon updating, the vessel type change process is completed, and the customer can download the registration certificate.

3.8 EXCHANGING THE REGISTRATION FROM PLEASURE TO FISHING OR FISHING TO PLEASURE

This service allows the provisioning of Vessel Swapping. In case the customer wants to change the types of two vessels owned by him, this can be done by swapping the type (fishing to pleasure or vice versa)

1. The service is initiated by the customer, where the request to exchange the vessel type form is submitted along with the required documents. The customer's existing owned vessels will be shown to select two vessels.
2. The registrar will then review the request and return to customer if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
 - 2.1. If needed, the registrar can request for an inspection at this point, triggering the inspection payment workflow. Inspections are optional and can be done only as needed.

Inspection sub-workflow process

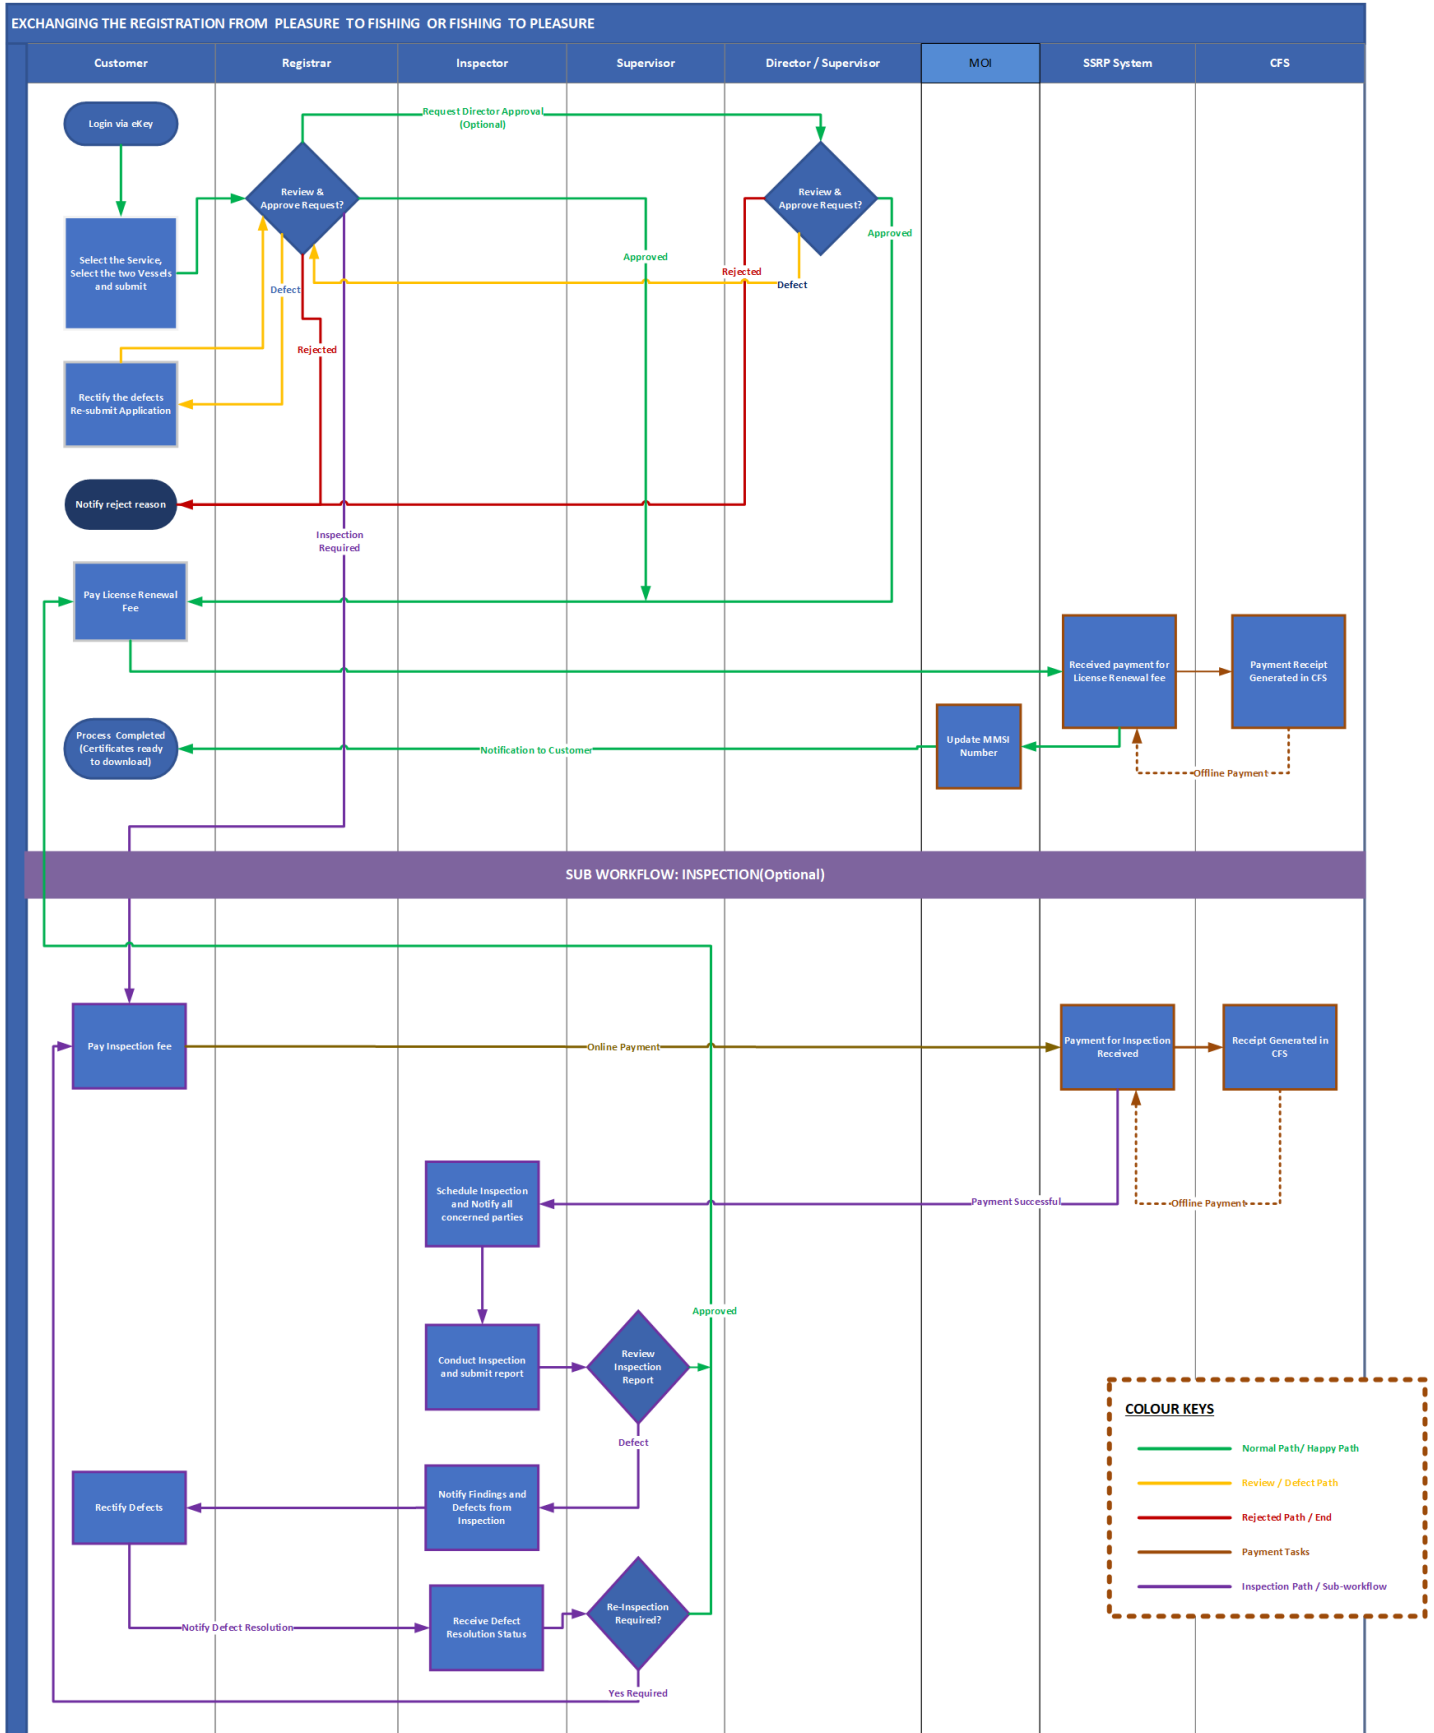

3. The customer must pay the inspection fee.
4. The inspector plays the pivotal role within this process. He would schedule the inspection and notify all concerned parties
5. From that point, when a date is agreed upon, the inspection is conducted.
6. The inspector would proceed to submit a report to the supervisor of the information identified.
7. The supervisor would review the report and take the decision on how to proceed. He would opt-to approve the inspection and move forward or report defects back to the inspector.
8. If there are defects,
 - 8.1. The inspector would notify findings and defects to the customer.
 - 8.2. The customer would take necessary measures and upon rectification, the customer will submit documents and images.
9. Upon customer rectification and submission, the supervisor will decide on if a **re-inspection** is needed. If **required**,
 - 9.1. The process would continue at step 03 – 09.

-
10. **If the inspection is not required**, the request can be optionally forwarded for director's approval. As the director approval will be optional, the registrar approval only could be sufficient.
 - 10.1. If the director approval is required, the request would be approved/ rejected or reviewed.
 11. If the director approval is not required, once the request is approved by the registrar, the customer would be requested to pay the prescribed fee.

3.9 NEW NAVIGATION PERMIT – PLEASURE VESSELS

This service allows the provisioning of applying for a new navigation permit for pleasure vessels.

1. The service is initiated by the sailor, where the request to apply for a new navigation permit is submitted along with the required documents.
2. The registrar will then review the request and return to the sailor if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. Once the request is approved by the registrar, the customer would be requested to pay the registration fee/ prescribed fee.
4. The sailor will then make the requested payment, which is verified and validated by the SSRP System and transaction details will be passed to CFS (Central Finance System) for receipt generation
5. After the online or offline payment is verified, the new registration certificate will be available for download.

3.9.1 WORKFLOW PROCESS

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

3.9.2 FORM

The screenshot displays the 'Small Ship Registry Portal' web application. The header includes the Ministry of Transportation and Telecommunications logo and navigation links: Home, Status Tracker, Accounts, Vessel, Profile, and Contact Us. The main banner features a sunset over a harbor with boats and the text 'Small Ship Registry Portal'.

The 'Navigation Permit - Pleasure Vessels' form is shown, featuring a red header with a link to instructions. The form is divided into two main sections: 'User Details' and 'Required Documents'.

User Details Section:

- Name:
- CPR Number:
- Nationality: (dropdown arrow)
- Address:
- Phone Number(s):
- Occupation:
- Gender: (dropdown arrow, currently set to Male)

Required Documents Section:

- Registration Certificate:
- Extract of CPR*:
- Valid Fishing Permit (for fishing vessel):
- RYA Training Certificate:
- Recent Photo*:
- Good Health:
- Other:

At the bottom of the form are three red buttons: Back, Save, and Submit.

3.10 RENEW NAVIGATION PERMIT – PLEASURE VESSELS

This service allows the provisioning of renewing a navigation permit for pleasure vessels.

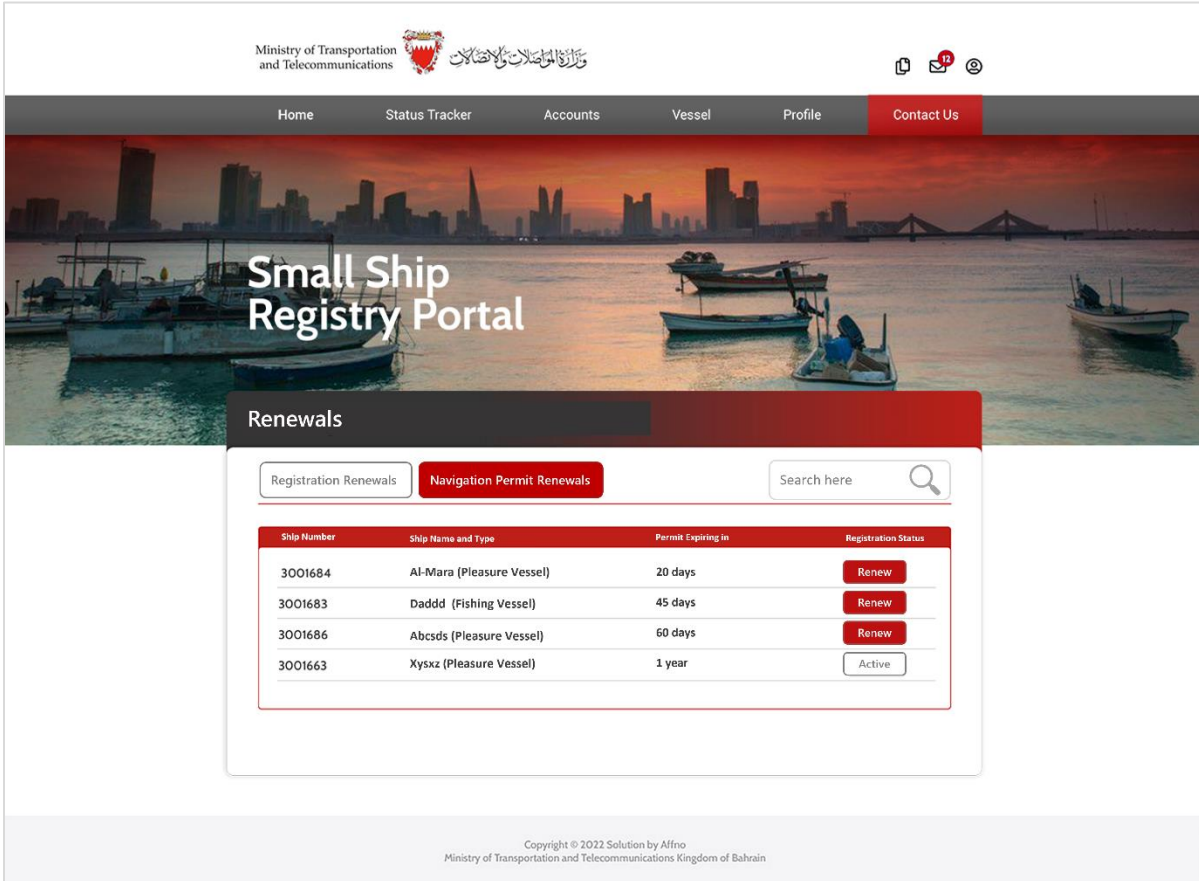

1. The service is initiated by the ship owner or sailor, where the request to apply for the renewal of a navigation permit is submitted along with the required documents.
2. The registrar will then review the request and return to the sailor if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. Once the request is approved by the registrar, the customer would be requested to pay the registration fee/ prescribed fee.
4. The sailor will then make the requested payment, which is verified and validated by the SSRP System and transaction details will be passed to CFS (Central Finance System) for receipt generation
5. After the online or offline payment is verified, the renewed registration certificate will be available for download.

3.10.1 WORKFLOW PROCESS

3.10.2 FORM

The navigation permit can also be renewed using the list under the renewal page. Once a selection is made, the auto-populated form will appear to the user.

3.13 DELETION OF SHIPS FOR EXPORT OUTSIDE THE KINGDOM OF BAHRAIN

This is a key functional service available to a customer, providing the ability to request to delete an owned vessel for export.

1. The service is initiated by the customer, where the request to delete vessel is submitted along with the required documents.
2. The registrar will then review the request and return to customer if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. With the approval by the registrar, the request can be optionally forwarded to the MOI Officer requesting return of AIS Device. With confirmation of receipt of AIS device, the workflow would move to the payment task.
4. The registrar can verify and validate receipt of original plate and ownership information in order to process the cancellation. once the payment completed, return the task to Registrar where he should have a check box to confirm that the plate + ownership (hard copy) received. task cannot be completed if the check box is not selected by the Registrar.
5. The customer will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
6. The online or offline payment is verified, the deletion certificate will be available for download.

3.15 REQUEST REPLACEMENT FOR SERIAL NUMBER FROM PMA

This service allows the ship owner to request replacements for boat serial number, due to damage or misplacement.

1. The service is initiated by the ship owner, where the serial number replacement request form is submitted along with the required documents.
2. The registrar will then review the request and return to ship owner if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request, forwarding for necessary approvals.
3. The request can be optionally forwarded for director's approval. As the director approval will be optional, the registrar approval only could be sufficient.
 - 3.1. If the director approval is required, the request would be approved/ rejected or reviewed. If needed, the director can request for an inspection at this point, triggering the inspection payment workflow.
4. If the director approval is not required, once the request is approved by the registrar, the ship owner would be requested to pay the prescribe fee/ inspection fee.
5. The ship owner will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
6. After the online or offline payment is verified, the inspection process must be done in order to download the receipt.
7. Note: issuing the serial number by the supervisor is an optional function.

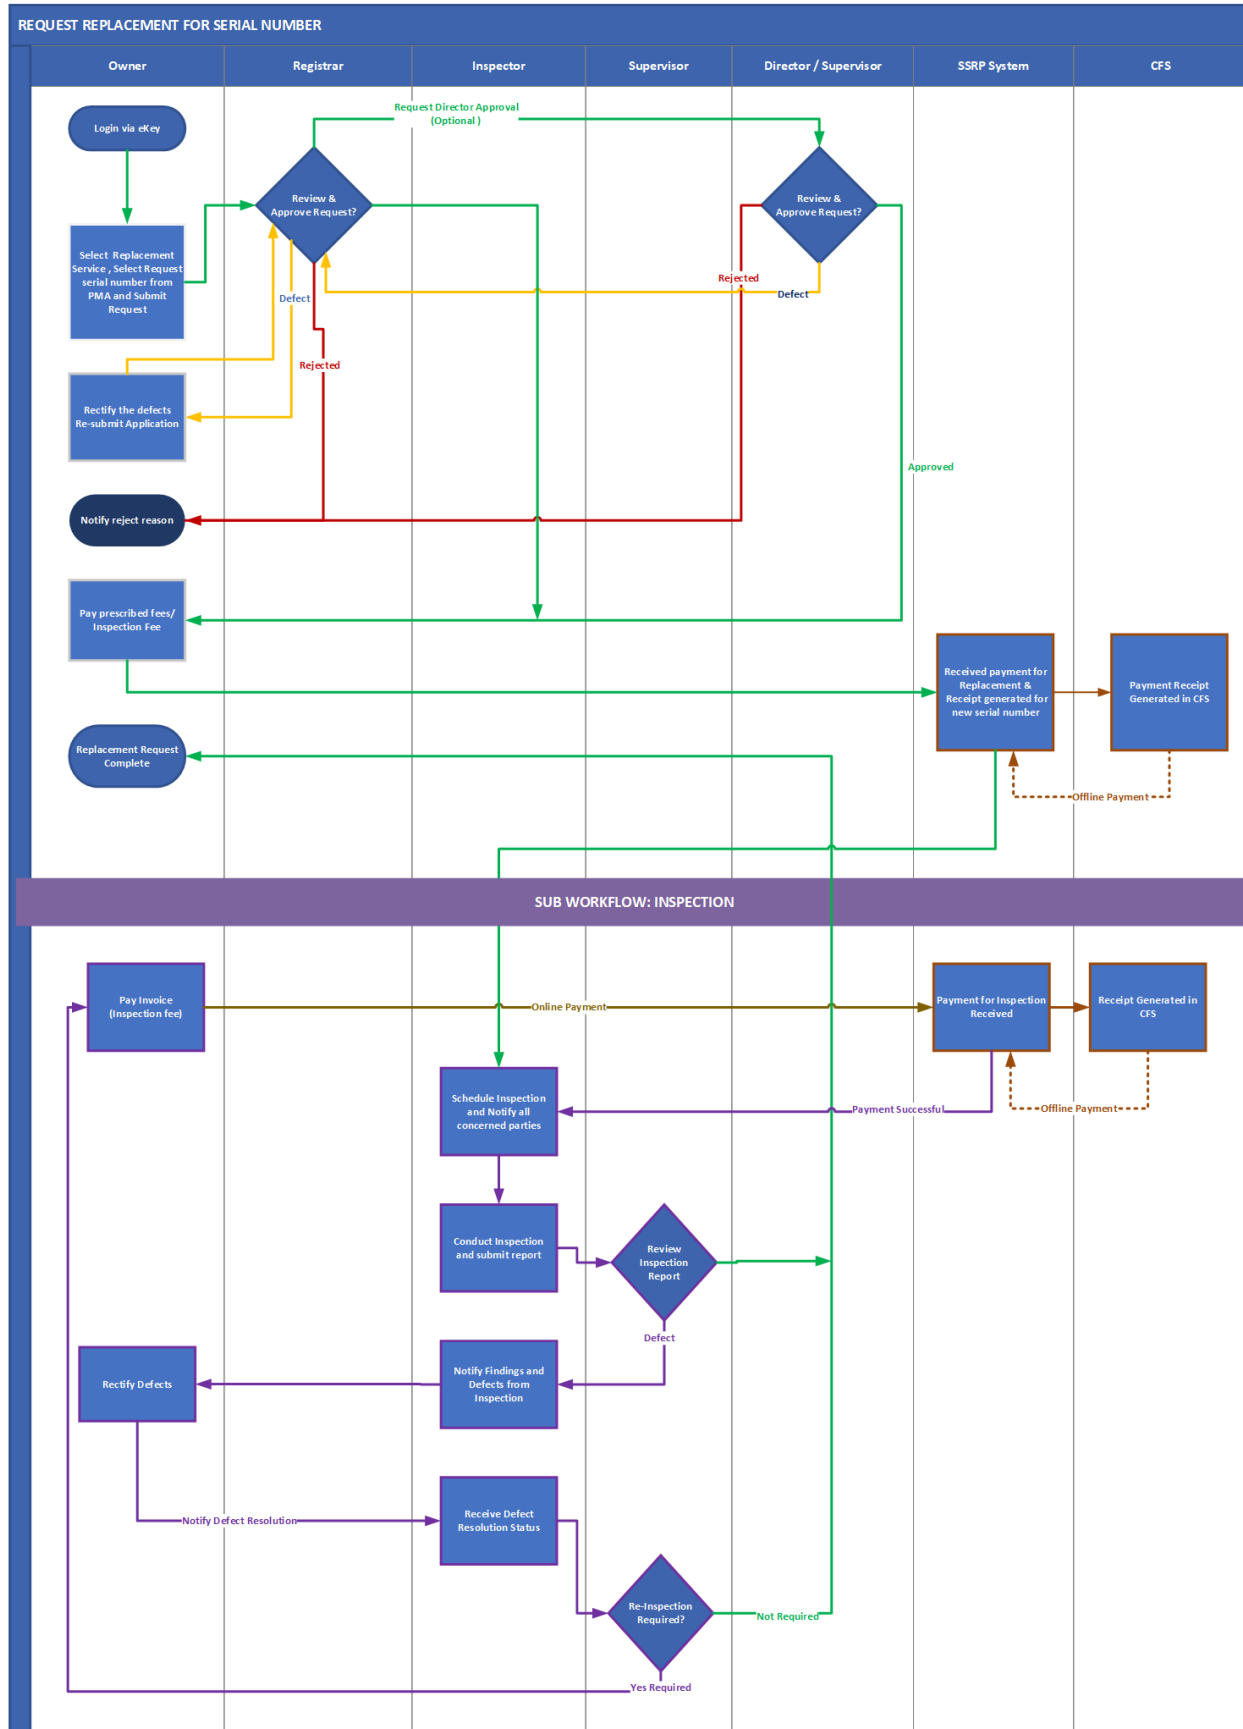

Inspection sub-workflow process

8. The inspector plays the pivotal role within this process. He would schedule the inspection and notify all concerned parties
9. From that point, when a date is agreed upon, the inspection is conducted.
10. The inspector would proceed to submit a report to the supervisor of the information identified.
11. The supervisor would review the report and take the decision on how to proceed. He would opt-to approve the inspection and move forward or report defects back to the inspector.
12. If there are defects,
 - 12.1. The inspector would notify findings and defects to the customer.
 - 12.2. The ship owner would take necessary measures and upon rectification, he will submit documents and images.
13. Upon ship owner rectification and submission, the supervisor will decide on if a **re-inspection** is needed. If **required**,

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

- 13.1. The ship owner must pay another inspection fee.
- 13.2. The ship owner will then make the requested payment, which is verified and validated by the System and transaction details will be passed to CFS (Central Finance System) for receipt generation.
- 13.3. The online or offline payment is verified, and the receipt for serial numbers will be available for download upon successful inspection.
- 13.4. The process flow would then continue from above inspection sub-workflow process (step 7 to 12)
14. If the **re-inspection** is **not required**, the serial number request replacement process is now complete allowing the ship owner to download receipt.

3.16 REQUEST REPLACEMENT FOR SERIAL NUMBER FROM FACTORY

This service allows the ship owner to submit a request to update the vessel serial number in SSRP.

1. The service is initiated by the ship owner, where the request for replacement of serial number is submitted along with the required documents.
2. The registrar will then review the request and return to the ship owner if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. Once the request is approved by the registrar, the SSRP system would be updated with the new serial number.
4. The process request is now complete.

3.17 REQUEST FOR REPLACEMENT NAVIGATION PERMIT

This service allows the ship owner/ sailor to request replacements of their navigation permit, due to damage or misplacement.

1. The service is initiated by the ship owner/sailor, where the request for replacement of the navigation permit is submitted along with the required documents.
2. The registrar will then review the request and return to the ship owner/sailor if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. Once the request is approved by the registrar, the ship owner/sailor would be requested to pay the registration fee/ prescribed fee.
4. The ship owner/sailor will then make the requested payment, which is verified and validated by the SSRP System and the Finance User.
5. After the online or offline payment is verified, the receipt for replacement will be available for download.

3.18 REQUEST FOR REPLACEMENT OF REGISTRATION CERTIFICATE

This service allows the customer to request replacement for registration certificate for boat or jet ski, due to damage or misplacement.

1. The service is initiated by the Customer, where the request for replacement of a registration certificate is submitted along with the required documents.
2. The registrar will then review the request and return to the customer if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. Once the request is approved by the registrar, the customer would be requested to pay the prescribed fee.
4. The customer will then make the requested payment, which is verified and validated by the SSRP System and transaction details will be passed to CFS (Central Finance System) for receipt generation
5. After the online or offline payment is verified, the registration certificate will be available for download.

NOTE: REASON FOR REPLACEMENT includes all options provided to customer when requesting the replacement certificate.

3.19 COMPANY REGISTRATION

This process allows company users to create their company profile with authorized users.

1. The service is initiated by the customer, where the registration for company is submitted along with the required documents.
2. The registrar will then review the request and return to the customer if documents are missing, or information is incorrect. When everything is in order, the registrar would approve the request.
3. Once the request is approved by the registrar, the finance user creates and enters the customer code.
4. The SSRP system would be updated and required user profiles will be created.

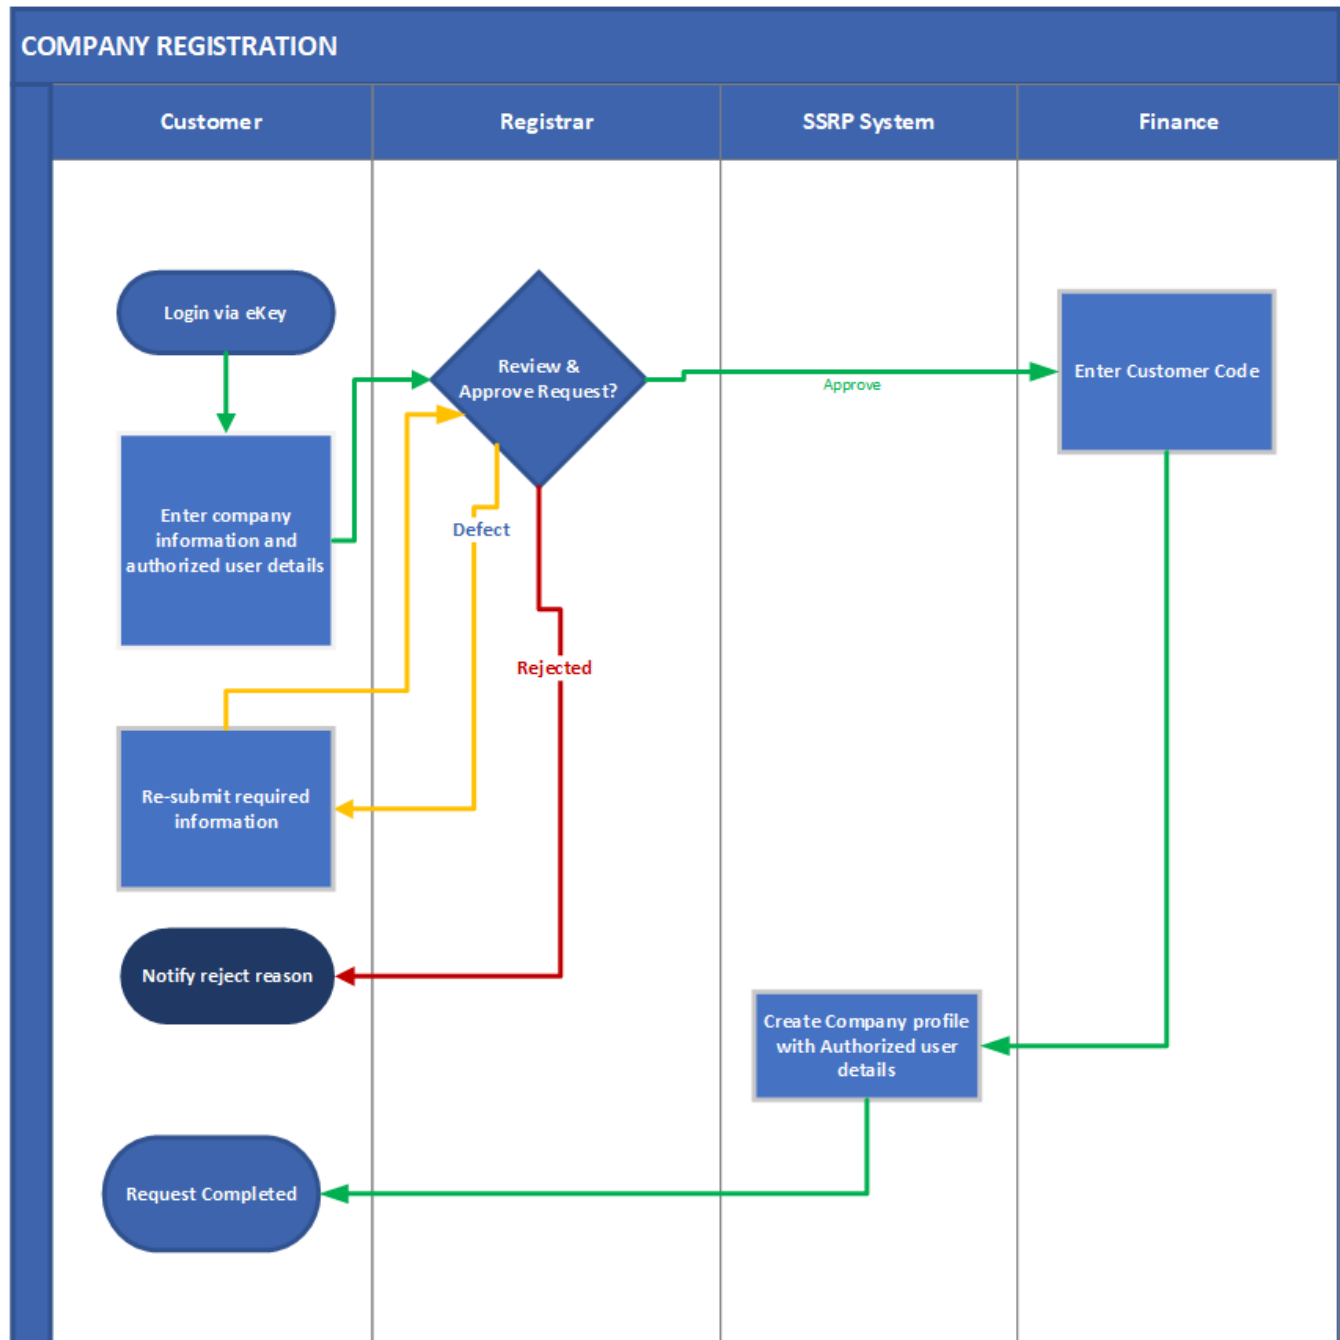

The company registration is now complete.

The registration process would follow the below given scenarios, in the event of individuals and company users- both new and existing.

Customer Type	Customer Status	Comments/ Remarks
Individual	New	The system will automatically create the profile using data received from eKey upon Authentication. The customer will be prompted with the data received from eKey, allowing the user to update their mobile number and email address via the profile.
	Existing	Existing data will be populated for this user type. The customer can update their mobile number and email address under the profile section.
Company	New	The company Registration process will be available for registered individuals. ▪ The registered individual can select the “Company Registration Service” and submit the registration application along with the required documentation. This will initiate the registration workflow. ▪ The company profile can be differentiated from the user profile with a different email and mobile number. ▪ Upon approval by PMA, the company profile will be created. ▪ After the successful creation of the company profile, each time the user logs in to his profile, he would be prompted to select “Personal” or “Company”. ▪ In the event, the same authorized user is representing two organizations, the system will display company names on a drop down selection.
	Existing	Existing data will be populated for this user type. The customer can update their mobile number and email address under the profile section. If there is more than one user, and one to be set as (default) to receive the notification
Passport holders without	New/ Existing	As discussed with Abdulla, Registrar to have an internal workflow to issue the licenses for passport holders.

3.20 ADD/REMOVE VIOLATIONS

This process is a single user internal MOI Officer function.

1. The MOI Officer will select the service available for internal users and search for the required Vessel/Jet Ski using a drop down.
2. The SSRP would then showcase all data related to that ship, if the registrar wishes to view.
3. MOI Officer will now then add the following information and submit the violation.
 - a. Add a remark or comment for reason in the violation field
 - b. Submit and vessel information is flagged as “WITH VIOLATION”
 - c. If a vessel has a violation attached, they cannot use services on the portal for that particular vessel.
4. The removal process is the same with the flag removed.
5. Data of violation is also stored.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

3.21 MOBILE APPS

3.21.1 REQUIRED FUNCTIONAL REQUIREMENTS

Users will interact with the system through mobile application too. Mobile applications for Android and iPhone will cover all key features from the Portal. The hybrid mobile application framework will be used to develop the mobile application. The UI will resemble a similar look-and-feel to a web interface.

The portal user will be able to conduct all tasks similar to a desktop using the mobile application. Similar to the web solution, the mobile application will provide the option to initiate a workflow, submit information and documents, request status updates and conduct payments.

The services covered would include,

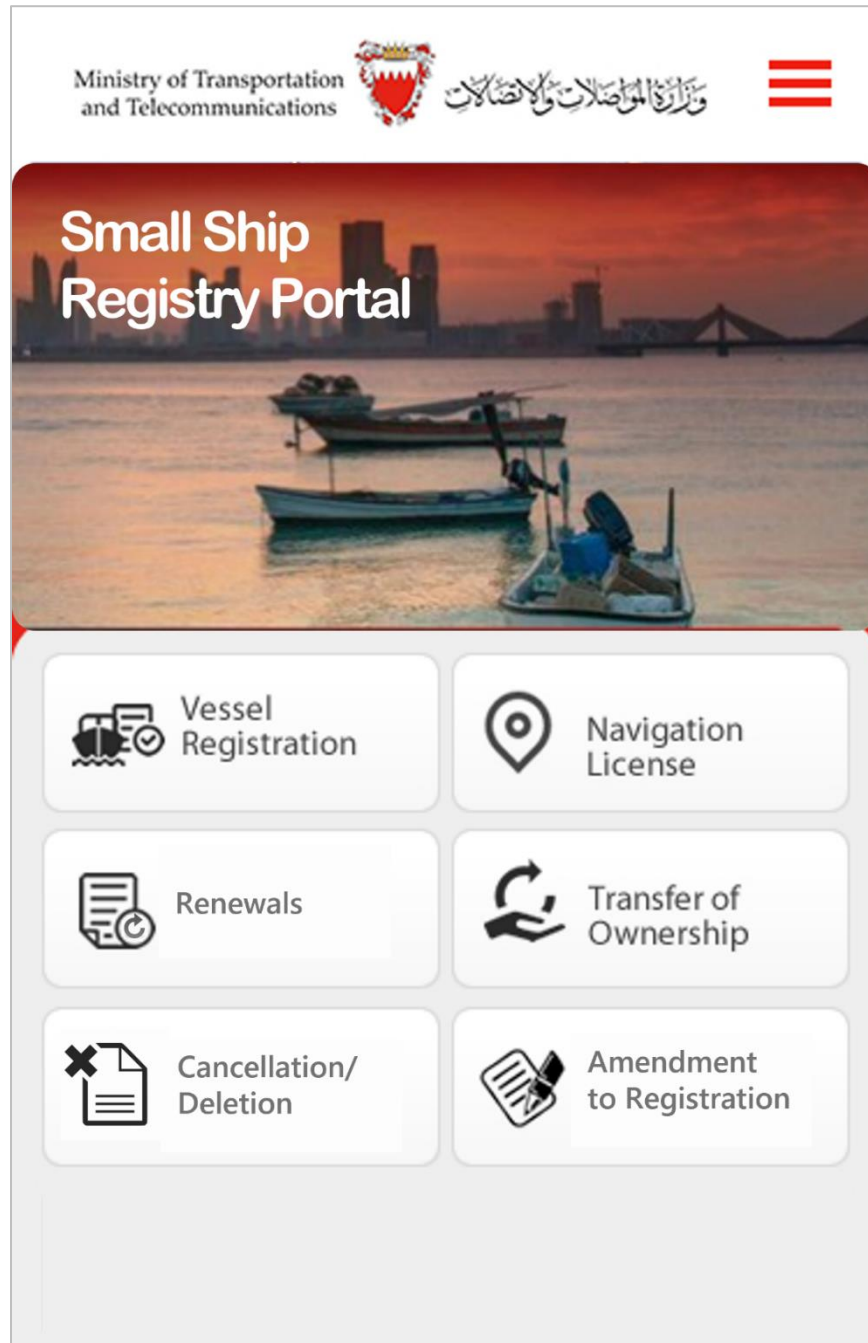

1. New Registration For Pleasure And Fishing Vessels
2. New Registration For Jet Skies
3. Renewal Of Registration For Pleasure Vessels And Fishing Vessels
4. Renewal Of Registration For Jet Skies
5. Renewing Navigational Permit - Fishing Vessels
6. Renewing Navigational Permit - Pleasure Vessels
7. Transfer Of Ownership Of Pleasure And Fishing Vessels
8. Transfer Of Jet Ski Ownership
9. Changing The Registration From Pleasure To Fishing Or From Fishing To Pleasure
10. Exchanging The Registration From Pleasure To Fishing Or Fishing To Pleasure
11. New Navigation Permit - Pleasure Vessels
12. New Navigational Permit - Fishing Vessels
13. Deletion Of Ships For Export Outside The Kingdom Of Bahrain
14. Request For New Number Plate/Side Stickers
15. Request For Serial Number
16. Request For Replacement Navigation Permit
17. Request For Replacement of Registration Certificate

All interfaces will be scaled to support latest devices across mobile web application browsers. The user will have an easy-to-use form design where the collapsible window would be shown.

Small Vessels Registration System, Ministry of Transportation and Telecommunications, Kingdom of Bahrain	Version: 2.02
System Requirements Specification	Date: 01/06/2022

As shown in the template wireframe below, all workflows will be accessible by mobile with similar interfaces to web.

The wireframe shows a mobile application interface for the 'Small Ship Registry Portal'. At the top, there is a header with the Ministry of Transportation and Telecommunications logo and name in Arabic and English. Below the header is a navigation bar with links: Home, Status Tracker, Accounts, Vessel, Profile, and Contact. The main content area features a large banner image of a white speedboat on the water with the text 'Small Ship Registry Portal'. Below the banner is a red bar with the text 'New Vessel Registration'. Underneath this is a red bar with a white exclamation mark icon and the text 'Click here for instructions'. The main form is titled 'Ship Details' and contains the following fields:

- Vessel Type* (Dropdown menu, currently set to 'Fishing')
- Ship Name* (Text input field)
- Ship Number* (Text input field)
- Type of Hull* (Dropdown menu)
- Hull No (Text input field)
- Hull Colour (Text input field)
- Previous Name(s) of Ship (Text input field)
- Engine No.* (Text input field)
- Engines Type and HP* (Text input field)
- No. Date & Previous Port of Registry (if any) (Text input field)
- Net Tonnage (Text input field)
- Gross Tonnage (Text input field)
- Draft (Text input field)
- Depth (Text input field)
- Beam (Text input field)
